Attention: Jeff Harris

Subject: Porter Permit No. 63-12550 Measuring Device Condition

Dear Mr. Harris,

In response to your September 5, 2007 letter to Richard Porter regarding discharge point measuring device requirements for Permit No. 63-12550, enclosed is a response from Lee Sisco, Watermaster for Water District 63. I spoke with Mr. Sisco and we discussed Mr. Porter's diversion from the Boise River under this permit. He agreed that a measuring device for discharge flows should not be required at this time as documented by his signature dated October 8, 2007. Therefore, on behalf of Richard Porter, we request that IDWR remove the condition requiring a measuring device for discharge flows.

Please let me know if you have any questions or concerns.

Sincerely,

Scott N. King, P.E.
Senior Project Engineer
