10. Remarks:

This application is for a nonconsumptive flow through right on an existing pond which fills with ground water. This addition of flow through to this pond increases the surface area on the pond by ten percent.

The land which is inundated by this increase was previously covered by pasture grass, with an precipitation deficit ET of 528.72 mm per year, the open water occupying the same space has a precipitation deficit of 513.25 mm per year. The additon of the flow through to this pond will result in a decrease in consumptive use of water.

11. Map of proposed point of diversion and place of use attached? ☒

BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.
