Stan Kress
Superintendent
Garden Valley School District #71

Hello Mr Kress:

An application for a permit for a new water use was submitted by the Garden Valley School District #71 in December 2006. It was assigned to me for processing. In the course of my review, some questions arose. I have attached a copy of the application as it was submitted and a second copy of the map with my note about the well location and with the place of use more clearly delineated in red.

1 - The application and accompanying map are not clear as to the purpose of the application and where specifically the water will be used. The map indicates a large place of use - approximately 70 acres. Is there a schematic of any kind that you can provide of what the buildings are in which the water will be used and where they will be located? Is the water to be used in the existing school buildings located east of Banks Lowman Road? How does this application relate to the other water rights that the District has?

2 - The map shows the existing well as overlapping 4 quarter-quarter sections. Please provide a map with the well in the correct quarter-quarter and with the correct place of use, if needed.

Please call me after you have had a chance to look at this email and the attachments so we can discuss further. Thanks -
