Terry,

You are correct that the diversion volume was determined based on the volume proportional to the diversion rate requested. We can adjust the amount rented if the reduced diversion rate is consistent with the amount diverted by the applicant. Please cross out and adjust the existing amounts listed on the rental agreement and return a signed copy with the rental fee. We will initial the changes and return a copy also signed by the department to the applicant. As per your request, the department will recognize rental of 17.4 af at a diversion rate of 0.04 cfs and a rental fee of \$191.40.

Let me know if you have any additional questions.

Cynthia

Cynthia and Noreen –

I received a copy of the water bank application for Tuscany Development Corp today. The application proposes rental of 87 acre feet. I believe that the actual amount requested was 16.8 acre feet. The reason for the discrepancy appears to be that we also requested a diversion rate of 0.20 cfs, and a 0.20 cfs portion of 63-15634 is 87 af. Would it be OK if we reduce the diversion rate to 0.04 cfs and rent 17 acre feet for \$187 rather than 87 acre feet for \$957? Let me know and we can get you a check. Thanks.

Terry
