RE: Two (2) Transfer Applications for: 36-8415, 36-16170.

Dear Corey:

Enclosed are two (2) transfer applications in the name of Rodney A. and Shirley S. Jentzsch. The sole purpose of the two transfers is to exchange 24 acres of 36-8415 with 24 acres of 36-16170, while creating a PPU for each right to allow flexible water management. Total acreage for each water right will not change after these transfers are approved. Water right 36-8415 currently irrigates 41 acres in T.09S R.24E. Sec. 1, and has a priority date of 03/21/1989. 36-8415 is in the name of Darrell James Baker, although the land appurtenant to 36-8415 was quitclaimed to Rodney A. and Shirley S. Jentzsch in 2006. An application for change of ownership for 36-8415 has been submitted with this transfer package to place 36-8415 into the names of Rodney A. and Shirley S. Jentzsch. Water right 36-16170 currently irrigates 160 acres in T.07S R.24E Sec. 2 SW ¼ and has a priority date of 06/07/1951. Due to the proposed same exact diversion volume (afa) moving between the two water rights in two different cells of the ESPA ground water model, spreadsheet modeling results showed a calculated net canceling affect due to the two transfers. Model results are included in this packet.

We have also included a limited power of attorney agreement to cover these transfers, a quitclaim deed for 36-8415, a marshal's deed for 36-16170, a change of ownership form for 36-8415, and two checks from Brockway Engineering for the amount of \$580.00 U.S. dollars. Please copy our office on all correspondence regarding these water right transfers. Thank you for your assistance and clarification on this matter and if you have questions or comments, please don't hesitate to call.

Regards,

Zach Latham, Hydrologist
