Subject: Application for Transfer of Water Right – Choutchourrou

Dear Mr. Lester,

Enclosed on behalf of Bernard and Toni Choutchourrou is an application for transfer of a water right. This application seeks to transfer a portion of 63-7194, converting the use from irrigation to stockwater associated with Choutchourrou's Dairy in Payette County. Water will be diverted from three existing wells. The applicant proposes limiting the total annual diversion volume to the consumptive portion of the transferred right. The proposed consumptive portion is based on an average irrigation requirement of 987 mm per year, as identified in Appendix E of the Allen and Brockway report (1983), Swan Falls Power House climate station, for alfalfa hay, a typical crop grown on the seller's property. A copy of the contract for sale of this water right, and appropriate deeds, are included.

A check for \$290 is enclosed to cover filing fees for this application. Please contact Terry Scanlan or myself with any questions or requests for additional information.

Sincerely,

Scott N. King, P.E.
Senior Project Engineer
