Subject: Jentzsch Transfer Changes

Corey-

Enclosed are the corrections you requested in order to continue processing the four water rights transfers submitted to IDWR (2 on 2/26/07 and 2 on 3/6/07) in the names of Rodney and Shirley Jentzsch by Brockway Engineering PLLC, regarding water rights 36-8415, 36-16170 and 36-15535. It is my understanding that minor clerical changes to the transfer applications can be made through our office because of the Limited Power of Attorney documents that were signed by the Jentzsch's and submitted to IDWR regarding these water rights transfers.

- With regards to the water rights transfer applications submitted on 2/26/07 dealing with 24 acre exchange between water rights 36-8415 and 36-16170 and creation of a 160 acre PPU in T.07 R.24E Sec.2 SW ¼, part 1 of the application on page 1 of the transfer dealing with water rights 36-8415 and 36-16170 should list 2 points of diversion, instead of one. The locations of the two points of diversion on page 1, Part 1 should be changed to list the same 2 POD's as are listed in Part 2 for water right 36-16170's current points of diversion, and are as follows: SW ¼ NE ¼ SW ¼ SEC.2 T.07S R.24E, and SW ¼ NE ¼ SE ¼ SEC.2 T.07S R.24E. This will keep this transfer consistent with concurrent transfers that have been submitted to your office. Also, page 2, subsection d Remarks: of Part 1 of the transfer application listing water rights 36-16170 and 36-8415 should state: " ³ – This portion of 36-8415 is limited to the irrigation of 24 acres within PPU." The 17 acres that were previously listed in this remark should be replaced with 24 acres, which is the acreage requesting to be exchanged by the two previously mentioned water rights in the two transfers.
- With regards to the water rights transfer applications submitted on 3/6/07 dealing with the 17 acre exchange between water rights 36-8415 and 36-15535, page 1, Part 1, Section A. Number 2 Describe the reason for the proposed changes, should be changed to state: "To switch 17 acres of existing 36-15535 POU with 17 acres of existing 36-8415 POU. A concurrent transfer associated with 36-8415 has been submitted to IDWR along with this application." Both water rights transfers submitted on 3/6/07 deal with the exchange of 17 acres of each water right listed above, and above quoted verbiage should be listed on the transfer to be in agreement with all other portions of the transfer of water right 36-15535.

Hopefully I have answered your concerns with the water rights transfers listed above that we spoke about this morning over the telephone. Please don't hesitate to call or email me with questions or comments regarding our requested changes listed above. We look forward to hearing of the progress made regarding all of the water rights transfers that have been submitted by our office in the name of the Jentzsch's. Thanks for your time and assistance on this matter, have a great day.
