DEPT. OF WATER RESOURCES
SOUTHERN REGION

RE: Two (2) Revised Transfer Applications for: 36-8624, 36-16170.

Dear Corey:

Enclosed are two (2) amended transfer applications in the name of Rodney A. and Shirley S. Jentzsch. The sole purpose of the two transfers is to exchange 10.6 acres of 36-8624 with 10.6 acres of 36-16170. No ground will be dried up with the approval of this transfer, only decree dates, associated places of use, and points of diversion will change for the water rights involved in these two pending transfers.

Total acreage for each water right will not change after these transfers are approved. Water right 36-8624 currently irrigates 10.6 acres in T.09S R.24E. Sec. 1 NE $\frac{1}{4}$ SE $\frac{1}{4}$, and has a priority date of 12/10/1991. The post-transfer location for the 10.6 acres associated with 36-8624 is marked by a blue hatched area shown on the attached Figure 2. Water right 36-16170 currently irrigates 160 acres in T.07S R.24E Sec. 2 SW $\frac{1}{4}$ and has a priority date of 06/07/1951. Due to the proposed same exact diversion volume (afa) moving between the two water rights, although in two different cells of the ESPA ground water model, spreadsheet modeling results showed a net canceling affect due to the two transfers. Modeling results are included within this transfer application package.

We have also included a limited power of attorney agreement to cover these transfers, a warranty deed for 36-8624, a marshal's deed for 36-16170 and a check from Brockway Engineering for the amount of \$350.00 U.S. dollars. Please copy our office on all correspondence regarding these water right transfers. Thank you again for your assistance on this transfer and if you have questions or comments, please don't hesitate to call.

Regards,

Zach Latham, Hydrologist
