Diana,
Please mail the letter I placed in your inbox to Scott Carpenter regarding the issue described below I expect Scott to amend his lease application I will then generate an amended lease acceptance and then proceed with the rental agreement for (Elmer) Dean Carpenter For the rental agreement, Blake Jordan indicated that a measuring device requirement condition is not necessary I printed a copy of this email chain to be included in the water right file Thanks.
Aaron

Aaron,
I did some investigation into the water supply bank rental for Dean Carpenter and found an issue that needs to be addressed. It appears that Scott Carpenter didn't dry up the 5 acres he leased to the supply bank (NENW Qq of section 14, T 07N R 33E) of water right 31-7167A It would of made more sense if Scott leased the 5 acres in the NWNW Qq of section 14, T 07N R 33E Was there a mistake on Scotts part when filling out the application?
Attached is a 2006 NAIP and Landsat 2007 Mosaic image showing a violation pertaining to the lease agreement

Gene or Blake,
Please look up Mr Carpenter's water right and NOV status, and get back to me
Thanks,
Lyle

Lyle,
A water supply bank rental application was submitted by Dean Carpenter to rent a 5 0 acre portion of water right **31-7167A**. An identical rental agreement was completed last year for Mr. Carpenter which can be found in the scanned documents of the water right file. A measuring device condition will be added to the rental agreement. As the watermaster for WD 110, do you have any comments regarding this rental? Thanks.
