FIELD EXAM NOTICE

RE: PERMIT NO. 67-02365

Dear Permit Holder:

We are planning to conduct water right examinations in the vicinity of the above-referenced permit during the week of June 5, 1989. An examination is needed to verify your water use in order to issue a water right license.

One of the conditions of approval of your water permit was that a flow measurement port, also known as an access port, be installed to provide for the installation and determination of the rate of diversion by the department. Enclosed is an instruction sheet for installing the flow measurement port. This port or an alternate measuring device must be installed prior to the time the examiner is scheduled to conduct your exam. If a flow measurement port or alternate measuring device is not installed at the time of the exam you may be subject to an additional examination fee.

Please be advised that you will need to operate your system under normal conditions during the examination.

In order to conduct your exam as efficiently as possible, we ask that you call this office to schedule a day and time convenient for you.

If there is a problem with scheduling or conducting the examination at this time, please call and other arrangements can be made.

Sincerely,

Kelly K. Christensen
Water Right Examiner

Note: I am usually in the office on Thursdays. Please call then if possible, but messages may be left on other days as well.
