Re: Combined Storage Limit

This afternoon I discussed with Dan Nelson the fact that Rights 67-7281 (75 af) and 67-7292 (90 af) share a single 90 af reservoir. Dan said that he thinks the reservoir fills once each spring with water from the two sources. It is not possible to know how much of the reservoir is filled from each source, so I added a condition limiting the two rights to a combined maximum annual diversion volume of 90.0 af.
