Kent,

I have had a chance to discuss your question regarding filing fees with the Department. The Department will determine the filing fee based upon the diversion rate of the pump. It is consistent with how the Department has handled other similar situations. Plus, MLWU will only need to file a single transfer application to add the pump to the surface water and ground water rights because all the water is diverted and delivered through the same system. Hope this helps. Let me know if you have any questions.

Garrick
