

MEMORANDUM

Date: January 18, 2008
To: Transfer 66684
From: cskinner
Re: Data Base Issues

Transfer # 66684 (old # 5262) is currently reflected in the WORKFLOW database as taking AJ record 41-8E and splitting it into AJ records 41-8F and 41-8G. The transfer was initially data entered pre WORKFLOW and proposed taking water right record 41-8E and splitting it into water right records 41-8F and 41-8G. During the database migration it appears that the AJ to and from records were assigned the water right numbers and suffixes (41-8E splitting into 41-8F and 41-8G). In reality, it appears that Transfer # 66684 (old # 5262) should have an AJ from record based on AJ record 41-8B. Note that 41-8F already exists in the WORKFLOW database in both AJ (closed) and WR (active) records having been migrated from the AJ database to the WR database as a result of its partial decree in the SRBA. Also note that WR record 41-8F is subject to pending transfer # 74110 (WR from record 41-8F and WR to record 41-8F).
