Kay,

I was just looking at Permit #86-7235. I believe the field examiner is recommending the place of use as the NWSE Sec. 34. I think the actual pou should be the NESE Sec. 34. I got this information by comparing the county lots using Arcview and the plat map that is enclosed in the permit file. The plat map shows NESE, but the examiner has the pou in NWSE in the "beneficial use field report". I was just letting you know so you could take a look when you do your final review before licensing.

Greg
