Subject: Proposed Transfer Application

Matt,

Attached is a draft transfer application that I believe will accomplish what you have decided on (transferring 50 acre portion from the north farm to the south farm). Along with the application I envision having your tax notices and water master affidavit as attachments that would accompany the application. Note that the application also reflects reducing the Cassia Creek right on the north farm by 50 acres and 1.0 cfs. I would suspect if we end up approving this, there would be some sort of condition limiting the use of the 50 acre transferred portion with the expansion right on the south farm. Probably something along the lines of either being able to irrigate 50 acres (transferred part of 43-4158) and 30 acres (43-2287) at one time, but not being able to irrigate the 50 acres (transferred part of 43-4158) when the 90 acres of expansion (43-10477) are being irrigated. I believe we have discussed this idea in the past, and it should allow you to run the pivot and still be able to water expanded acres to the north, but not at the same time. If approved, right 43-10123, in the name of Golden Gardiner, will be sucked into the approval to update the condition it has limiting it when combined with 43-4158 (right you want to transfer) to a combined 1.40 cfs (currently limited to combined rate of 2.40 cfs). This should not impact right 43-4158 since it authorizes the diversion of 1.4 cfs.

Please review the attachment carefully to make sure it proposes what you have in mind and to make sure I didn't miss something. If it looks acceptable you and your wife can sign it before a notary and send it back to our office. However, we will need a letter from you asking to withdraw your current application (assigned transfer # 73739) and asking us to apply the \$250.00 filing fee (IDWR receipt # S029512) to the new replacement application (assigned transfer # 74278).

Sorry this has taken so long. Give me a call if you have any questions, or want to discuss any of this.

Corey
