Dear Mr. McKannon:

Enclosed is an Application for Transfer which we spoke about on April 29, 1975. This Transfer will change License No. 95-2160 back as it was when we first issued it.

The Transfer should be signed by the Administrator of the Estate, and we will need some evidence to verify this. We will also require a $30 transfer fee.

If you should have any further questions, feel free to contact our office.

Dear Mr. McKanna:

Reference is made to your telephone call of April 29, 1975, in which you had several questions regarding the above referenced transfer.

Since the approved transfer shows the point of diversion for the 3.0 cubic feet per second as being within the SE¼SE¼, Section 16, Township 51 North, Range 5 West; there currently is no right to divert from the well located in the NW¼SE¼, Section 16, Township 51 North, Range 5 West as originally licensed. If in fact, you intend to divert from the well in the NW¼SE¼ rather than the well in the SE¼SE¼, Section 16, as indicated in the telephone conversation; you should submit another application for transfer which could, if approved, cause the right to be described as originally licensed.

I would also like to point out that a water right can be lost thru five years of nonuse in Idaho.

If you have futthur questions concerning this matter, please feel free to contact this office or our Northern District Office located at 401 Front Avenue, Room 209, Coeur d'Alene, ID 83814. The telephone number for our Northern District Office is 667-6484.

Dear Mr. Clay:

In reference to your letter of January 16, 1970 wish to state that we have just had definite confirmation from the Burlington Northern Railroad in regards to the land which the above permit covers the irrigation thereon. The railroad has decided that they will not be doing anything regarding the purchase of this land for an indefinite time to come.

Now that they have come to a decision we want to inform you that we will resume irrigation on a regular schedule beginning April, 1971. We did irrigate during the 1970 season also and no one from your department came to re-examine the system because we had no way of knowing what the outcome would be with the railroad.

Kindly let us hear from you as to when you will be in this area to re-examine the system.

Boise, Idaho

Dear Sirs:

Would you kindly check into the permits to dig wells for which I applied several weeks ago. (Form # 3) I applied for two permits to Appropriate Subterranean Waters of the State of Idaho.

With either fall or spring seeding I would have to know right away whether the permits have been granted.

Kindly call me collect on Monday, September 14th, so that I will know what to do one way or the other. My phone number is AL5-6147, Liberty Lake, Wash.

Thank you for your prompt attention.

Yours very truly,

Andrew Finneman

Re: Permit No. G-32034

Dear Mr. McEldowney:

As of this date I have not received a certificate and license of water right in connection with permit # G-32034.

The last correspondence I received from you was dated Sept. 11, 1967.

Would you kindly look into this matter and let me know the results as this seems to be taking much too long.

Yours truly,

Andrew Finneman

Dear Mr. Finneman:

We acknowledge receipt of the depositions and affidavit of publication in the Kootenai County Leader submitted as proof of completion of works and beneficial use on Permit G-32034.

Before a certificate and license of water right can be issued, a field examination must be made by a representative from this department. We cannot tell just when this examination will be made, but our field examiner will try to contact you at the time he makes the examination so that you may show him the system.

Very truly yours,

Re: Two Applications for Permit

Andy Finneman
P. O. Box 113
Liberty Lake, Wash.

Dear Mr. Finneman:

Returned herewith are the two applications for permit to appropriate subterranean water with attached check for $10.00

The amount of water claimed, 1800 gpm, or 4.0 c.f.s. requires filing fee of $5.75 each application, see page 4 of application.

The points of diversion under 4 do not agree with location of wells on the sketch maps. The answer under 12 requires acres in each subdivision, read instructions. Answer 13 on both application. The maps for Section 15 do not agree with answer to 12.

Very truly yours,

RALPH W. THOMAS, Deputy
State Reclamation Engineer
