Re: Application For Permit to Appropriate the Public Waters of the State of Idaho.

Dear Mr. and Mrs. Vincent:

In processing your application to appropriate ground water to supply domestic and irrigation to 8 housing sites, it was discovered the well proposed to be used, as the point of diversion, was constructed as a single family domestic only. Before the department can go any further the well will need to be upgraded, which only entails an additional fee of \$125.00.

A well driller is required to purchase a permit prior to any well construction. Single-family domestics require a permit fee of \$75.00. The permit fee for all other uses is \$200.00. In this case, your driller purchased a domestic permit in the amount of \$75.00, which should have been \$200.00.

You can either mail in the additional fee or drop it by our office. All checks should be made out to the Idaho Department of Water Resources (IDWR). I hope this has not caused you any inconvenience.

Thank you.

Sincerely,

Keith E. Franklin
Senior Water Resources Agent
