

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

RECEIVED

DEC 15 2007

CLAIM TO A WATER RIGHT

Department of Water Resources
Eastern Region

Under the provisions of Section 42-243, *Idaho Code*, any person claiming a water right established by diversion and application of water to beneficial use must file a claim with the Department of Water Resources. **The filing of this claim does not confirm the water right claimed.** Water rights represented by a valid permit, license, decree, or previous claim are exempt from this requirement, as are uses of water for domestic purposes as defined in Section 42-111, *Idaho Code*. A filing fee must be submitted with this claim. See the instruction sheet to determine the appropriate fee.

Notice is hereby given that Trout Creek Culinary Water Inc.
(Name of Claimant)
314 Lago-Liberty Rd Grace Id. Telephone No: 208-427-6233
(Mailing Address) (Zip Code) 83241

claims a right to the diversion and beneficial use of surface or ground water. The extent and nature of said claim is as follows:

1. Date of Priority: (When the water was first applied to beneficial use) 5/1/1929
A claim is not acceptable for the use of surface water with a priority later than May 20, 1971. A claim is not acceptable for the use of ground water with a priority date later than March 25, 1963, unless the water is used for domestic purposes as defined in Section 42-111, Idaho Code.

2. Describe the source of water: (Name of stream, lake, spring, etc., or ground water) Trout Creek Spring tributary to Trout Creek

3. Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:

Quantity	(cfs or af)	Use	(Irrigation, Domestic, Stock, Etc.)	(Both dates inclusive)	
				(MM/DD)	(MM/DD)
Quantity <u>0.69</u>		Use <u>Domestic</u>		Period of Use From <u>1/1</u>	to <u>12/31</u>
Quantity _____		Use _____		Period of Use From _____	to _____
Quantity _____		Use _____		Period of Use From _____	to _____
Quantity _____		Use _____		Period of Use From _____	to _____

4. 0.69 TOTAL QUANTITY USED.
(cfs or af)

5. A) Location of point of diversion is SE $\frac{1}{4}$ of SE $\frac{1}{4}$ of SW $\frac{1}{4}$, Govt. Lot _____
Sec. 15 Township 11S Range 41E B.M., Caribou County; additional points of diversion, if any: _____

B) Describe means of diversion of water: (Pump and pipeline, well, diversion dam, reservoir, length of ditch etc.). Give sizes and capacities. Be specific. Describe any changes in the system and give the date of the change.

10 inch Steel Pipe from Spring to Diversion Bx
6 inch Pipe From Diversion Box into system

SW

[illegible]

6. A) Describe the place of use within each 40-acre tract in the appropriate box using the symbols listed below. If the use is for irrigation, describe the location by listing the number of irrigated acres within each 40-acre tract.
D - domestic, S - stockwater, M - municipal, C - Commercial, I - Industrial, X - other

Twp	Rge	Sec	NE¼				NW¼				SW¼				SE¼				TOTAL
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	ACRES

TOTAL ACRES _____

See attached.

- B) If water is used for purposes other than irrigation, fully describe the use. Be specific. _____

NOTE: Include here the type and number of stock watered: _____

7. Remarks: 39 homes

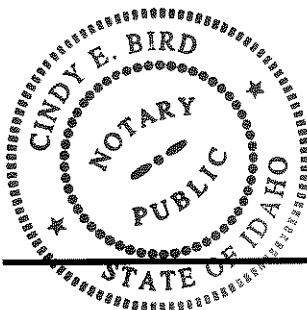

8. **Map** – Attach an 8½"x11" map clearly identifying the point of diversion and the place of use by 40-acre subdivisions, section, township and range of the public land survey system. (A photocopy of a USGS 7½ minute topographic quadrangle map is preferred.) Attach an **aerial photograph** of the place of use if available.

State of Idaho)
County of Bannock) ss.

Be it known that the undersigned, being duly sworn, deposes and says that he, she, they subscribed the forgoing claim to a water right, together with all attached information, and that the matters and facts therein are true to the best of the affiant's knowledge.

Dr Ronald Hamm President
Claimant's Signature (and title if claim is for an organization)

Sworn to before me this 17th day of December, 2007.

Cindy E Bird

arid as Bear River ran through a deep, rocky canyon gorge.

In about 1889, a little colony of people from West Jordan, Utah, came to this area and settled. Among them were Samuel W. Egbert and family. They moved from West Jordan in two covered wagons and were ten days making the journey. Soon after, Edward Montague and Olaf Olsen arrived, and in 1893, David D. Sullivan moved to the area from Trout Creek. At the time these settlers

came, there were only two homesteads here. Both were located in the two canyons on the east side of the valley. One was owned by a man named Robert Kirkham, who had purchased his rights from an old fellow named Tom Arnett. In 1891, Kirkham sold this place to Fred Burton, Sr. of Kaysville, Utah, who had come to Idaho in search of range land for his sheep. The other homestead in the east canyon belonged to Jim Mickelson. Farther up the canyon was the squatter's claim of Edward Nelson, who was probably the first man in the

This bridge, the first across Bear River at Grace was built about 1893. The log cribs for the bridge were built on the ice when the river was frozen over and left there to settle when spring should come. Then the boards were laid and the sides built. Looking at this picture you will see how deep the water was before it was taken out for irrigation and power. Those who lived here then will remember the roar of the river could be heard anywhere in the valley, night or day. This bridge was used until 1908 when the "steel bridge" was built east of this location. Both of these are gone now and the present one is almost where the first one was. The old building on the north side of the river was the only 'town' there was at the time and was built around 1900. It was owned by the late Q.R. Pack and housed a general store, a saloon, living quarters in the back, and a dancehall upstairs.

To Whom It May Concern,

I married Val Steele of Lago, Idaho. Val and his father Harry Steele purchased the Sorenson Farm in the 1920's. When I married Val, I moved onto the farm and we worked there all of my husbands life. We turned the farm over to our children who still live and work there now. We had the oldest farm in Lago. We had the largest water right in the Trout Creek.

John Sorenson (1870) and his family went to the head of Trout Creek and built ditches to bring the water down to our farm. He had livestock and many acres of hay. He told us about how he used horses and ditch diggers to make the ditch. There were large rocks that had to be removed and he would hook chains onto the rock and drag it out of the way. He would wrap the chains around the willow and hawthorn bushes to drag them out of the way. They hired men to help with the work and they would stay in the extra two homes on the farm. John had built a barn in 1870 and had teams of horses used in constructing the canal. The big home was built in 1894. He was well known and respected.

The Sorenson ditch was a great accomplishment. It brought water to land that made it very valuable. In 1959, my husband was given a grant by the ASC to put the water into a pipeline with gravity flow. That meant that we didn't have to pump anymore. It also meant that Val didn't have to flood irrigate as he had in the past. This was a great day for us. It gave Val more time to do other things. This was a very expensive venture for us. It also meant conserving water for the government.

I have first hand knowledge of this because I was there. I well remember helping Val by holding a flashlight to set new dams late at night or early in the morning. Val never let one drop of water go to waste. He forfeited many family times to go irrigate by setting new dams.

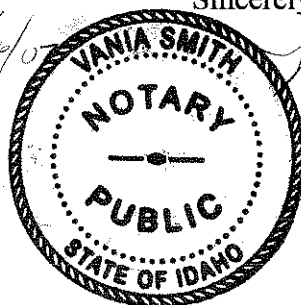

We had 350 cows and calves and 350 yearlings besides numerous bulls and horses. They drank the water brought through the farm from the Sorenson Ditch. I know the ditch benefited the neighbors in the same way. There were many small dairies that used the ditch for their animals. They used to ciphen the water to their ditches.

I remember that the water right was older than the State of Idaho. I wondered how that worked, as I worked for the US Government as a GS7 until retiring.

All of this was from firsthand knowledge.

Sincerely,

State of Idaho
Caribou County

John A. Meacham
2253 Lago-Liberty Road,
grace, Idaho 83241

To Whom it May Concern:

I was born in Lago, Idaho in 1934. I grew up on the dairy farm my father owned five acres of which is now owned by me and is my place of residence. My father and mother, Elvin and Ora Meacham, had a family of ten children. We used water from the Sorensen Canal as culinary water and as water for the dairy and to water the live stock. The Sorensen Canal water was the only sources of water for the livestock year round.

I have personal knowledge that Harris A. Mickelson, from whom my father purchased the farm, used the Sorensen Canal for culinary water and for the livestock as we did. Harris had a family of 5 children. Jim Fowler who owned the farm before Harris Mickelson also used the Sorensen Canal as the source of culinary water and for livestock water.

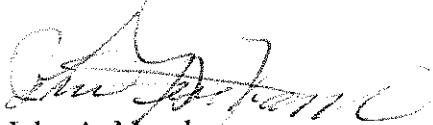

There was a pipeline that came off the top of the hill about one half mile from our house that provided water to the Elvin Meacham family as well as the Ruud Family, consisting of Andrew, Norman and their mother, who were our neighbors to the north. Boyd Ruud and his wife Jane Occasionally, in the winter time, the pipe, which was exposed where it crossed a wash, would freeze up and we would have to go up there and thaw it out with a welder. We cleaned the canal every spring and we all participated in cleaning the screens and the pond fed by the canal where the water was diverted into the pipe line.

My wife's grandfather, Michael Mickelson, owned a sawmill at the foot of the hill. He used the canal as a source of water for the mill. The large pipe line coming down the hill from the same pond we used is still visible. The mill was sold to the Robinson Brothers, Rex and Lynn. They used the Sorensen canal water for the sawmill and both families as well as two other homes of people who worked at the mill used the canal water for culinary purposes. Rex had a family of four children and Lynn had two children.

My father sold the farm to my sister.. ~d'her husband, Joyce and Reed Kirby, who had a family of seven Children. They used the Sorensen 'Canal water for culinary water and for live stock. The farm was sold to my Sister's son Todd Kirby who has no children. Todd uses the Sorensen Canal water for culinary and for livestock.

William P. Hansen and his wife Carol, who was my sister, had seven children. They lived in the Rex Robinson house after the Robinsons shut the mill down and moved away. Phil and Carol used the Sorensen Canal for culinary and live stock purposes. Mr. Hansen and his current wife still live there in a newer home and use the water for culinary purposes. I have personal knowledge of others who used the Sorensen Canal for culinary and livestock purposes.

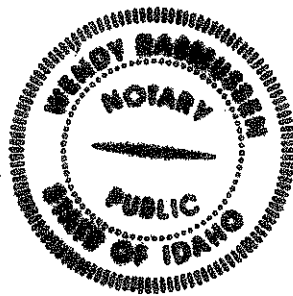

Eugene Thomas (Blacky) lived right on the Sorensen Canal. He and his wife and Four children used the canal water for culinary and livestock purpose. His daughter Joanne was my age and we went to school together. His three sons Lowell, Max and Virgil, worked for my father in the summer time. At the bottom of the hill where Lee Hall currently lives, Bill and Sybil Harris and their two sons lived. I sued to go there and play with their sons. Bill and family use the canal water for culinary purpose. The newer house that is there occupied by Mr Hall still uses the canal water for culinary use. Emil Hansen and his family of four used the canal as a source of water for the home and for livestock. Emil's sister and mother lived across the road. And also used the canal water for the home. I associated with the people mentioned above as a child and youth and have personal knowledge of their use of the water as stated.

To whom it may concern,

I have lived in Lago all my life. I grew up watering livestock and irrigating my family's farm ground from the Sorensen canal with flood, siphon, and handline methods. I helped maintain and clean the canal for many years and was familiar with every inch of it, at the time. I helped construct and install most of the irrigation head gates and the diversion outlets for the homes taking their drinking water from the canal. I can testify that all the following people piped water directly from the canal for their family's homes before we put in the culinary pipeline.

Subject: water

There used to be a sawmill across the road from the Phil Hansen residence. A man named Hilliard owned it, and later sold it to Alfred Hansen. About 1918, he sold it to Michael Mickelson. There was a severe cloudburst in the 1920's that washed out the ditch up on the hill above the mill and also, washed out the mill, and made the big wash in the south side of the hill. It also brought down the huge boulders that are in the fields below.

Michael rebuilt the mill, which was powered by a water wheel, that was run by the large steel pipe from the ditch above the mill. A water line was run to the farm where Harris Mickelson lived, and may have been there previously for Don Bassett, a former owner. This line came from the ditch above the mill. This ditch also furnished culinary water for all the people who used it for irrigation. Others who did not irrigate, but lived here, used it also. In other words, everyone living below the ditch, relied on it for water. There was also a ditch that ran north, above the road that goes to Bench. It was also used for culinary water.

The people who lived on the Bitton, Harris head of Trout creek did the same thing.

Because of irrigation, and natural seepage, The people on the creek bottoms had shallow wells that tapped the gravel layer, which is only a few feet deep. Michael Mickelson drilled a well about 1902 and at 218 feet hit an artesian well. In the late 1950's, Ed Meacham drilled and got another artesian well. I know of no other deep wells These were both good wells, with very cold water, and they both had natural gas in them.

In 1971 or 1972, a pipeline was run from the head of Whiskey creek, and supplied the people on the west side of the valley.

Dear Sir,

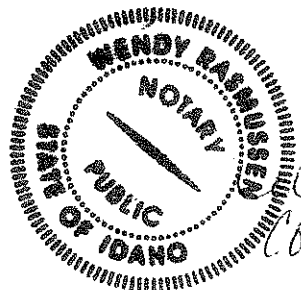

May 30, 2007

My name is Boyd Ruud and I was born in 1929 at what is now the Brent Christensen place. I have lived my entire life in Lago and know the Sorensen ditch like the back of my hand. My father, Glen Ruud was the watermaster in Lago for about 20 years, from the mid 1930s to the mid 1950s, and I accompanied and helped him on many occasions diverting water from the canal for the local residents. As I got older I irrigated our land, watered our livestock and helped with the yearly cleaning and maintenance of the ditch as did most of my friends and neighbors. In 1959 I became the secretary of the Sorensen Ditch Company and served for ten years with the president Reed Hansen. I can still today show you the exact location of every one the irrigation headgates and culinary pipes siphoning water from the ditch. I have first hand experience and knowledge of the following families drinking water directly or indirectly from the ditch up until the Trout Creek Water line was put in during the late 1970s.

1. There were four to six cabins at the sawmill with culinary water lines for the workers.
2. The saw at the mill was originally powered by water pressure until they got a diesel Engine
3. Andrew Ruud family 4. Norman Ruud family 5. My Family, Boyd and Jane
6. Phil Hansen family
7. Emil Hansen family 8. Peter Hansen 9. Richard Campbell place
10. Eugene Thomas Family in the old Blackie place
11. Una Hansen 12. Reed Hansen family 13. Dorteia Hansen 14. Richens Family all in what is now Berry Hansen's home
15. Bill Harris family 16. Jess Coombs family
16. Wayne Hansen 17. William Meachan family 18. Henry Loyd family
19. Glen Ruud Family 20. Alan Ruud 21. Jay Barker in what is now the Brent Christensen place
22. Elvin Meacham family 23. Don Bassett family 24. Harris Michelson family
25. Reed Kirby in what is now Todd Kirby's place.
26. Yard Harris Family 27. Charles Hubbard family 28. Willard Bitton family
29. Dean Mathews family in what is now Ross Harris's place
30. Leon Swensen family 31. Hugh Heath family 32. Jack Hubbard family

March 1, 2007

Dear Member,

In case you did not know, the old Trout Creek Water Co. ceased to exist in 1981 and the by-laws and user agreements you now possess have no legal status. And even more importantly, there was no legally recognized entity to own the pipeline.

Realizing this precarious legal situation, the board of directors you elected last year took the necessary steps to protect our treasured water system and your invested equities. The board, acting as incorporators, established a new nonprofit corporation called Trout Creek Culinary Water Inc. which includes all the certified members of the previous company.

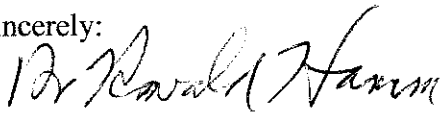

The board has composed and approved a set of by laws and a user agreement for this new water company. We are supplying a copy of both documents for you to examine and a ratification ballot.

These are carefully crafted and worded documents that have been edited and rewritten several times by the board, approved by legal council and an English teacher. The board took considerable time and pains to take into consideration all the pertinent government codes, statutes, agency policies and civil laws that are now involved in the regulation of such a water system. It was carefully designed to preserve the present quality and character of this most precious resource for you and your descendants.

In the April meeting, we will be discussing the results of the vote on these documents as well as **handling a great many other issues having to do with the transition.** Therefore we simply will not have time to read, discuss and debate the many individual articles of these documents at that time. It took the board at least two hours to go through the documents on each and every edit. Consequently we are asking you to carefully review these two documents and vote ahead of time. If you have issues with or questions about the different articles please contact anyone on the board to offer a suggestion, register a complaint or to get clarification on a particular point. Please do this well ahead of time so that the board will have the time to consider, address and hopefully resolve all those problems before the meeting.

The meeting in April is technically an incorporation meeting rather than an annual membership meeting, therefore the entire membership needs to vote. Mail or hand in your ballot to one of the incorporators below or bring it with you to the meeting (a return address sticker is included for convenience) Beverly Mickelson has tendered her resignation as a board member and Secretary Treasurer effective as of the April meeting.

Sincerely:

Dr. Ronald Hamm....427-6233

Brent Christensen.....427-6207

Ross Harris.....427-6246

Roven Gunnell.....427-0099

IMPORTANT:

This is the user agreement that must be signed, witnessed and filed for members to receive or continue to receive a water diversion. It is the document that legally binds the signatories to the provisions of the By-laws. It simply says that you agree to abide by all the rules and regulations outlined in that document and accept the penalties described for infractions.

Read it carefully and then bring it with you to the April meeting so we can get it witnessed and filed at that time. If you can not attend the meeting contact me personally for an appointment to get this done.

Sincerely

A handwritten signature in black ink that reads "Dr. Ronald Hamm". The signature is written in a cursive style with a large, stylized "H" and "M".

Dr. Ronald Hamm
President

WATER USER AGREEMENT

IN THIS AGREEMENT, the licensed private, nonprofit Idaho corporation No. C165034 called Trout Creek Culinary Water Inc. will be herein referred to as "the corporation" and a legal owner of one of its diversions hereinafter will be referenced as "the member".

The Trout Creek Culinary Water Inc. No. C165034 is not to be confused with the now defunct Trout Creek Water Co. No. C56477

WITNESSETH

WHEREAS, a certified diversion owner desires to divert untreated residential culinary water from the corporation's private culinary waterline and to enter into a water users agreement with regard to same.

NOW THEREFORE, it is hereby understood and agreed: The corporation will allow for the diversion of a quantity of water for domestic residential culinary purposes to the address listed on the member's ownership certificate, subject to the limitations outlined herein.

The member understands and accepts that the water so diverted is untreated spring water. It is not sterilized and consequently requires some discretion in its use.

The member agrees to pay the annual assessment as determined by the board of directors and accepts the consequences of delinquency or nonpayment as outlined in Article 9, sections 5 through 10 of the corporation's by-laws. The member also must understand that the fee assessment is commensurate with owner certification and is applicable as of the certification date regardless of the user's agreement filing and water delivery.

The member understands and agrees that no other source of water will ever be connected to any waterline served by the corporate distribution system and that the corporation will not provide a diversion for an address if there is any other developed and functional domestic culinary water supply available.

The member hereby grants the corporation, its successors, or assigns a perpetual easement in, under, and upon the described property with the right to erect, construct, install and lay, thereafter use, operate and inspect, repair, maintain, replace and remove corporate water lines and appurtenant facilities, together with the right of ingress and egress over adjacent land for the purpose mentioned above.

The member must understand and agree that the diversion valve, pressure reducer, and meter are all corporate properties reserved for the exclusive use of corporate officials.

The member consequently must agree to:

1. Get authorization before making any alterations, additions, or changes to said.
2. Have any authorized work done on these regulatory devices inspected and approved by the compliance officer and/or a board member.
3. Maintain these devices in such a fashion as to be readily assessable for inspection and servicing by company officials

The member shall install and maintain at his own expense the service line which will be connected to the corporate owned diversion valve. The member will also pay for the installation of a new corporation diversion valve if one is required. The corporation will not extend its pre-established distribution lines to accommodate this connection. The board of directors will specify the exact location of any new diversion valve. A new diversion cannot be established on a distribution line if it will substantially and negatively affect the pressure and volume of preexisting units on that line.

The member will accept metering if the compliance officer and board have reason to question the volume of his diversion. This would include, but not be limited to a pressure/volume complaint by other members, any diversions where a second residence is involved, more than 100 head of livestock are watered or where there is any other extended use suspected or evident.

The member must acknowledge the nature of compliant use as outlined in Article XI of the corporation's by-laws and agree to accept the procedures and penalties for noncompliance as enumerated in Article XII of the same. This includes the payment of a \$100 fee for opening a diversion valve temporarily closed by a decision of the board.

The member agrees not to extend the use of the water in any way that could potentially challenge the company's legal status as a private nonprofit organization or put it into a libelous situation.

The member agrees to acknowledge and abide by all the other tenants of the corporation's by-laws and amendments not specifically referenced and enumerated in this document.

The member agrees to accept the board's discretionary authority in extra-ordinary circumstances and emergencies to allocate waters, pass and enforce temporary rules and regulations as outlined in Article VI sections 5, 6, and 7 of the corporation by-laws.

A diversion owner must understand and acknowledge that commensurate with Article III, section 6 of the corporate by-laws, failure to sign, witness, and file this agreement precludes the diversion of any water. A diversion owner/member of the old Trout Creek Water Co. who is already connected and diverting water from the line must sign, witness, and file this document upon presentation to continue receiving water. Any owner that does not sign, witness and file this agreement upon its presentation will be automatically shut off and disconnected from the new corporation's water line.

IN WITNESS WHEREOF, we have hereunto executed this agreement on _____

SIGNED: _____ CORPORATION PRESIDENT

MEMBER SIGNATURE: _____ CERTIFICATION #

RENTER SIGNATURE: _____

WITNESSED BY: _____

BY-LAWS of
TROUT CREEK CULINARY WATER INC. C165034

ARTICLE I. Definition - Purpose - Location

Section 1. A private, nonprofit corporation for distributing culinary water to its members via a corporate owned waterline.

Section 2. The location of the corporate office and primary contact will be the office/residence of the current president elect.

ARTICLE II. Water Rights

Section 1. The corporation does not own water until and if a pending water transfer, filed with the Department of Water Resources, has been approved, officially registered, and these bylaws so amended.

Section 2. The corporation does not own and cannot sell membership/diversions.

ARTICLE III. Membership/Ownership

Section 1. Membership in the corporation is based upon the legal private treaty ownership of certified diversions from its waterline. The corporation will not supply water for uncertified/nonmember diversions

Section 2. Membership is limited to the owners of properties that are immediately contiguous with and easily accessed by the corporation's established distribution lines.

Section 3. Commensurate with Idaho Code 42-111 (3) the corporation will not provide a diversion to an address that has another developed and functional domestic culinary supply.

Section 4. A certificate of ownership entitles the owner thereof to a membership in the corporation, one single residential/domestic diversion and a vote in all company meetings. Membership equals stock in the corporation.

Section 5. In accordance with DWR policy, ownership certificates are associated with the specific domestic residence historically supplied and will automatically be transferred as part of any subsequent legal sale of that residence/property, unless otherwise and previously arranged and approved by the board of directors.

Section 6. The user agreement must be signed, witnessed, and filed with the secretary-treasurer before the corporation will supply any water to a certified member's diversion.

Section 7. Each member upon signing, witnessing and filing a user agreement will be entitled to receive 13000 gallons of water daily through a corporation owned ¾ inch diversion valve. The initial cost and maintenance of the distribution line distal to that diversion valve will be borne entirely by the individual member.

Section 8. Membership will be limited to forty certified owners.

Section 9. The board may create additional diversions in the future only if:

- (a) A licensed hydraulic engineer determines the system's potential capacity is sufficient to handle more diversions without significantly compromising the pressure/volume of the existing ones.
- (b) The new member is assessed and billed at a parity value.

Section 10. All memberships are equal and all the diversions added on to the system subsequent to the original thirty-three will be billed for capital investments in such a way as to eventually achieve parity.

Section 11. An ownership certification establishes membership and the obligation to pay the annual assessment. The signing of a user agreement or the time, amount, and actuality of the water diversion are not relevant in the calculation of the assessment.

ARTICLE IV Membership Meeting

Section 1. The annual meeting of the membership for purposes of electing directors and transacting business shall be held on the fourth Monday of April each year, beginning in the year 2007.

Section 2. Special meeting of the membership may be called at any time by the president, three members of the board of directors, or $\frac{1}{4}$ of the total membership if:

- (A) The entire membership is officially notified, a least ten days prior, of the nature, time and place of this meeting.
- (B) All business transacted in the meeting must be duly recorded and filed with the secretary-treasurer as official minutes.
- (C) Those minutes must be presented and read at the next officially scheduled meeting of the general membership.

Section 3. A written or printed notice of all membership meetings will:

- (a) Be delivered personally or by mail at least ten days prior to the scheduled meeting to all certified members, who have not registered a waiver of notice.
- (b) State the place and time of the meeting, and in the case of special meetings, the purpose or purposes of said.

Notices mailed to the member's current billing address of record will be deemed to be delivered at the time of posting.

Section 4. 10% of the total membership constitutes a quorum. An affirmative vote of a majority of the members present passes a measure for all business decisions outlined in and authorized by these by-laws.

Section 5. A $\frac{3}{4}$ majority vote of the members present at a given meeting is required to amend the by-laws, amend the owner's agreement, or override a board of directors' decision.

Section 6. The individual listed on the certificate of ownership is the only one entitled to vote in corporation meetings. However, in cases of absentia, any other legally aged immediate family member, or an unrelated individual presenting a signed proxy, may vote on their behalf.

Section 7. In the election of directors every member shall have the right to vote for each director nominated. A majority vote of the members present elects a director.

Section 8. The order of business, so far as possible, at any meeting of the general membership shall be as follows:

- (a) Roll call
- (b) Reading of notice and proof of mailing
- (c) Reading and disposition of the minutes of the last membership meeting.
- (d) Report of officers

- (e) Report on board of directors meetings and considerations with all the signed proposal documents thereof made available.
- (f) Unfinished business
- (g) New business
- (h) Election of directors
- (i) Budget
- (j) Adjournment

ARTICLE V. Board of Directors

Section 1. A board of five directors, all of whom shall be members of the company, shall manage the business, property and affairs of the corporation. Each director shall hold office for three years and until his successor has been elected and qualified at an annual meeting of members in April.

Section 2. The directors will serve staggered terms so that no more than two will be elected any given year.

Section 3. Directors shall not be paid or receive directly or indirectly any compensation for their services.

Section 4. A director may resign his position at any time by addressing a letter to the board or directors, effective upon receipt.

Section 5. A director may be removed from office by the membership in a general or special meeting if:

- (a) The entire membership is notified of the proposal 10 days prior to the meeting.
- (b) The director involved is given full opportunity for defense and rebuttal.
- (c) The majority of members present vote for such action.

Section 6. The board of directors has the discretion by a vote of three to appoint another member to fill a vacancy on the board. A director so appointed will serve out the term of the replaced director subject to a conformation vote of the general membership at the next annual membership meeting.

ARTICLE VI Functions and Duties of the Board

Section 1. A board meeting will be convened commensurate with and immediately following the annual membership meeting to elect or confirm corporate officers.

Section 2. The president or any two directors may call for an official consideration and decision of the board on matters of corporate business at any time they deem necessary. The president has the discretion to:

- (a) Call for a board meeting to discuss and vote on particular issues.
- (b) Circulate a written proposal to all the individual board members for their consideration and approval.

Section 3. All issues calling for a vote of the board must be fully outlined in a formal document. The director's signature on this document will constitute their official vote to approve, disapprove, qualify, or waive decision on the specific proposal outlined therein. Board members voting against the measure may, at their own discretion, supply a written dissenting opinion to appendix the document. The signed proposal document plus

appendix will be recorded and filed with the secretary-treasurer and be presented at the next membership meeting for the scrutiny of any interested members.

Section 4. The acknowledgement and vote of all active board members is required to finalized any considered issue. The board's approval will be established by a majority vote of three for all business decisions described in and authorized by these by-laws.

Section 5. When deemed necessary, the board of directors by unanimous vote may pass measures that are not specifically described in or authorized by the by-laws. Any rules, regulations, or actions so adopted must be subsequently discussed and approved by a 3/4 vote of the members present at the next annual meeting or at a special meeting convened for that purpose. Amendments to the by-laws authorizing such measures will then be considered by the membership.

Section 6. In times of unique emergency the board of directors may adopt by unanimous vote special temporary rules and regulations as may be deemed necessary and expedient to insure the legal and proper use of the companies facilities by its members. Those special rules and regulations will become null and void upon the successful resolution or termination of the emergency requiring the same.

Section 7. The board of directors will ultimately determine the allocation of water to members in the advent of a water shortage or a delivery problem. The board of directors will prorate the available water among the members on such basis as they deem equitable.

The board may in such cases:

- (a) Prescribe, require, and enforce a schedule for water use.
- (b) Enforce rationing.
- (c) Limit or prohibit specific kinds of water use.

In all cases the domestic residential supply of all members in the system must be serviced before any member will be allowed to extend their use for any other purpose.

The priority will be and remain:

- (1) Domestic residential culinary (2) Livestock (3) Garden/lawn

ARTICLE VII Corporate Officers

Section 1. The officers of the corporation shall be president, vice president, and secretary-treasure, all of whom will be selected by and from the sitting board of directors.

Section 2. The Powers and Duties of the president are:

- (a) Primary contact for the corporation.
- (b) The principle executive officer, generally supervising and managing day to day corporate business, subject to the control of the board of directors.
- (c) Presiding authority at all meeting.
- (d) Executor of all the orders and resolutions handed down by the board of directors.
- (e) Sign checks, deeds, mortgages, bonds, contracts, membership certificates, or any other instruments the board of directors authorize.
- (f) Holds and applies the company seal.

Section 3. The vice president shall, in the absence of the president or in the event of his death, incapacitation or refusal to act, assume the power and duties of the president.

Section 4. The Secretary –Treasurer shall have the following powers and duties:

- (a) Directly supervise and manage the activities of the clerk.
- (b) Record or have recorded the proceeding of all official company meetings.
- (c) Present the minutes at all annual membership meetings, and make available all of the board's signed proposal documents for the preceding year.
- (d) Insure all necessary company correspondences are executed dutifully, legally, accurately and in a timely manner according to corporate and state law.
- (e) Maintain custody of the company records and books.
- (f) Bill, receive, and deposit all money due the corporation.
- (g) Maintain the corporate bank account and pay all duly authorized bills.
- (h) Provide upon the request of a board appointed auditor a timely account of the corporations financial status and a complete record of all financial transactions made by the treasurer in the execution of their duties.
- (i) Maintain a secured deposit in the sum of \$10,000 until such a time as the waterline mortgage is retired.
- (j) Upon leaving the position of secretary-treasurer surrender the checkbook and all other books, papers, records, and properties of the corporation entrusted to them.

Section 5. A clerk will be employed by the board to support the secretary –treasure in the execution of those duties. The Clerk must have sufficient skills to effectively perform the necessary clerical duties of the secretary-treasurer.

Section 6. The board of directors will appoint a compliance officer from among the general membership. A licensed and experienced compliance officer is needed to:

- (a) Take the government mandated water samples.
- (b) Advise the president and board about government regulations, standards and methods.
- (c) Provide a level of technological expertise and practical insights with regards to management, maintenance and construction.
- (d) Investigate and evaluate systems during compliance and cross contamination inspections.

ARTICLE VIII Contracts, Loans, Checks and Deposits

Section 1. The board of directors must authorize any contract or legal arrangement made by officials or agents on behalf of the corporation.

Section 2. All corporate funds not otherwise employed shall be deposited in a secure account to accrue interest.

Section 3. All payments made by officers on behalf of the corporation must be paid by a two-signature check and/or documented by cash receipts approved and filed with the secretary treasurer.

ARTICLE IX Fiscal Year and Fiscal Matters

Section 1. The fiscal year shall be January 1st to December 31st.

Section 2. The secretary –treasurer shall, prepare and submit a complete fiscal report to the board at the end of each year.

Section 3. The board of directors will prepare a budget to be submitted at each annual meeting for approval by the membership. This budget should include all operational, maintenance, and debt retirement costs.

Section 4. The books of the secretary-treasurer shall be audited annually by a member/auditor approved by the board. Individual directors will have full access and discretion to inspect the books any time they deem necessary.

Section 5. The secretary-treasurer will assess the membership for the sum established by the board in section 3, dividing the fee equally among the membership according to individual certificate ownership.

Section 6. Membership assessments will be billed as of June 1st and be due and payable on or before the first day of July. The bill may be paid in full, or by installments previously approved by the secretary- treasurer.

Section 7. Delinquency notices will be issued on July 1st

Section 8. The diversion of all memberships remaining delinquent by Aug 1st will be temporarily shut off and a special meeting of the board of directors will be convened to address and rule on the issue.

Section 9. A \$100 reconnection fee is required before the corporation will reopen the diversion valve and deliver water for that or any subsequent owner.

Section 10. The certificate of ownership on accounts that remain delinquent for more than three months without the board's approval will be canceled and the diversion permanently disconnected from the corporation's water line. Members so expunged forfeit all rights and claims to corporate equities.

ARTICLE X Amendments and Additions

The by-laws and owner's agreement may be amended, repealed, or revised by a $\frac{3}{4}$ vote of the members present at the annual membership meeting or any special meeting called specially for that purpose and sufficiently noticed.

ARTICLE XI Definition of Compliant Use

Section 1. Trout Creek Culinary Water Corporation is a privately owned nonprofit corporation delivering untreated spring water exclusively for the use of our local resident members' families. It is not a public utility. The board must carefully restrict the members' use of the water to retain these all-important designations under the various state statutes, civil law and our state department license.

- (a) No member/owner in the system will be allowed to extend the use of their diversion to a significant number of non-residents for culinary purposes. IDAPA 58.01.08 limits the whole system to 25 individuals for 60 days a year.

- (b) No member can divert more than 2500 gallons a day for their own personal incidental use in a residential business enterprise as outlined and set forth in: Idaho Statute title 42-111, (1)(b) and (2)
 - (c) No member can directly profit from the sale, donation, or use of any amount of the water delivered by the corporation's line.
 - (d) No member can extend the use of their culinary diversion to nonresidents for any other purpose, including but not limited to recreation, landscaping or irrigation.
- Section 2. Each diversion will be allowed a volume of water not to exceed the government's mandated 13000 gallons a day and will be limited to:
- (a) A single domestic residence with related outbuilding.
 - (b) Livestock.
 - (c) A ½ acre garden /lawn

ARTICLE XII. Procedures and Penalties for Non-compliance

Section 1. A compliance complaint filed with the corporation by any legal member of the company, or government official must/will result in an official inspection of the facilities involved by the compliance officer and at least one board member. The board must officially notify the accused offender and arrange for this compliance inspection. Refusal to allow for this inspection or to interfere with it in any way will result in a temporary shut off of the diversion valve. Any attempts to deceive or mislead corporate officials during the inspection will also be grounds for the immediate and temporary cessation of service.

Section 2. Any and all unauthorized and undisclosed attempts to physically alter an inspected diversion after an official inspection will result in the permanent termination of service and a disconnection.

Section 3. The board of directors in special meeting will review the findings of the compliance inspection to decide upon the merits of the complaint. The board may decide at that time to dismiss the case, request more information, impose sanctions, issue ultimatums or proceed to a permanent shut off of the diversion.

Section 4. Failure to accept any of the boards imposed sanctions and/or regulatory measures will automatically result in a permanent termination of service.

Section 5. Any diversion temporarily shut off by the board for compliance violations will be physically disconnected from the corporation's water line after thirty days if the compliance issue remains unresolved to the satisfaction of the board.

Section 6. The ownership certification for a diversion officially shut off and/or disconnected will remain in effect and continue to accrue membership assessments.

Section 7. The decision of the board may be appealed in a general membership meeting by a ¾ vote of the membership present.

Section 8. Any owner/member of a diversion found guilty by the board of willful compliance violations or deception and consequently disconnected will not be allowed to reconnect and divert water from the corporation's line.

Section 9. Any subsequent legal owner of a disconnected diversion may be certified as a new member if the account remains current according to Article IX sections 6 through

10. The new member will receive a water diversion upon signing, witnessing, and filing a new user agreement and providing for the reinstallation of the disconnected valve.

ARTICLE XIII Cross contamination

Section 1. When the compliance officer or member of the board identifies a potential for cross contamination from another water source or a plumbing design flaw the board must act immediately to remedy the problem. This involves shutting off the water diversion valve supplying the residence in question. The valve will remain closed until such a time, as the problem is resolved to the satisfaction of the compliance officer and the board.

Section 2. Any member that refuses to allow for a physical examination of the potential cross contamination issue or who will not cooperate with the control measures suggested by the compliance officer and the board will be permanently disconnected from the corporation's water line.

ARTICLE XIV. Borrowing - Leasing – Renting

Section 1. A member may elect to rent, lease, or loan their diversion to another individual only if they have the previous approval of the board. The board's approval will be based upon the following:

1. The parties must submit a proposal to the board detailing the location of the new diversion valve and distribution line.
2. The owner must agree to have their original diversion value removed or capped by or under the direction of corporation officials.
3. If the new diversion is to replace a previous culinary water source, a cross contamination inspection must first be conducted. Any regulatory measures deemed necessary by the compliance officer and the health department must be officially authorized and in place before the new connection can be physically made.
4. They must provide a copy of their agreement outlining in detail the terms of the arrangement between the parties involved. Those terms must include dates, limitations, and any other pertinent stipulations.
5. The renter must sign, witness and file a water user agreement.
6. The owner must agree in writing to surrender their hook-up and owner's certificate in the future in the event any government mandates or legal actions award the new hook-up permanent status.
7. All the costs incurred in the installation of the new hook-up must be covered by the owner/renter and ownership of the new diversion value must ultimately be transferred to the corporation.
8. The member/owner of the hook-up will continue to be billed and held accountable for the yearly assessment. The member/owner will also be ultimately responsible for any additional fines, fees, or regulatory costs incurred by actions of the renter.

ARTICLE XV. Legal Actions of Officials

In the future, any action taken by corporate officials that do not conform to the procedures outlined in the corporation by-laws will be rendered null and void. The corporation will not be legally bound to any contract, deal, or arrangement made by corporation officials or members on behalf of the corporation that are not described in and authorized by these by-laws.

APPROVED and SIGNED by the incorporators and board of directors of TROUT CREEK CULINARY WATER INC. No. C165034 on February 15, 2007

1. Brent Christensen
2. Timothy M. Mink
3. Dr. Ronald Hamm
4. Raven Hunsell
