Jeanie,

Apologies for the confusing numbers.

Here is the background on why those numbers changed: Originally, the BLM was going to allow continuing irrigation of the southern portions of the pivots that exist on BLM ground. Toward that end, an initial split was prepared to provide 36.8 acres to the BLM. This is shown in the WR_splits-large.pdf. Later, BLM determined that the additional irrigation could not be permitted so another split was prepared to provide BLM only 32 acres for irrigation only in the SW ¼ SW ¼ of Section 29 in 6S, 23E. This split is shown in WR_splits-Large-revised.pdf and should be the basis for all current pending transfers on these water rights 36-2268A and 36-10090.

I believe you have in your file applications of both versions from the original submittal and the revised submittal. Please review to verify that you don't already have the revised applications signed by the applicants.

Thanks,

Jason C. Helms, P.E.

Hi Jason,
I think the problem Boise is having is that the original transfer application lists the amounts as 0.91 cfs from 36-10090 and 3.58 cfs from 36-2268A when the approval document and the actual transfer reflects the amounts as 0.93 cfs from 36-16517 and 3.65 cfs from 36-16515, which is also slightly different than the irrigation split agreement but matches the spreadsheet you provided. Maybe if you could make a new amended application with the correct amounts (and right numbers) and at least have them initial it or something, it would make more sense to Boise? The BLM one seems to look okay to me. (Call if you have questions.) Thanks, Jeanie
