Re: Application For Permit to Appropriate the Public Waters of the State of Idaho

Dear Mr. Gendreau:

The Idaho Department of Water Resources is returning your recently submitted application for additional information and clarification.

Item #3 Location of Point of Diversion

The application indicated the proposed point of diversion is located in the Northeast Quarter of Section 25. From the map submitted with the application, the proposed point of diversion is actually located within the SW $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Section 25. Please cross out the NE $\frac{1}{4}$ on the application and insert the correct quarter quarters in the remaining two spaces. Please initial the change.

Item #4

The application indicated the use will be for irrigation of a lawn and orchard, between January 1 and December 31, with a maximum diversion of 0.04 cfs. The normal diversion authorizes for the irrigation of either $\frac{1}{2}$ or $\frac{3}{4}$ acres is 0.02 cfs (9 gallons per minute). If your proposal demands more diversion, please supply information that will justify 0.04 cfs, such as a designed landscape irrigation system, otherwise indicate 0.02 cfs on the application in **Item #4 and Item #5**.

In addition, the irrigation season in your area is from 4/1 to 10/31 inclusive, not January 1 to December 31. Please make this change on the application form.

Item #9 Place of Use

Please cross out and initial the 0.04 as indicated on the application and place the desired number of acres in the box for the SW of the NW with either $\frac{1}{2}$ or $\frac{3}{4}$ acres, not both.

COPY

Once the department receives the corrected application, processing can proceed. If you have any questions, feel free to contact me at this office.

Sincerely,

Keith E. Franklin
Senior Water Resources Agent

Enclosure.
