37-21297

Shelley,

The permit needs to expressly state that the minimum bypass flows are instantaneous and include a requirement for a measuring device capable of measuring instantaneous flows and a timeline for installation of the instantaneous flow measuring device e.g. within xxx days of xxx the applicant shall install If I recall, I don't think we recommended average daily flows at Arkoosh's Little Wood River Ranch I Project. Please advise if I am wrong on this count.

Otherwise, I believe you have captured the essence of what we require of Mr. Arkoosh. Thanks. If you have any questions, give me a call at 287-2714.

Scott G.

Scott,

Once again we're working on the water right application for the Little Wood River Ranch II hydro project (Bill Arkoosh). I've attached some draft conditions for the permit. I think no. 12 is the one that you will be most interested in. I tried to capture the essence of the agency comments submitted by Harriet Hensley in April of 2004. Please take a look and get back to me with your thoughts, concerns, etc.
