Ron,

That sounds great. We're looking at the Little Wood River. I'll be in on Monday and Tuesday next week, then out until the 18th.

Shelly
Lets talk next week when I'm back in the office. Yes we do plan it
publish in future, some points are better than others, and like you said
it can be a very useful tool.
I'll call you next week - which basin are you looking at. Some need more
timely flow/diversion data .
Ron

Ron,

Thanks. We're not so much interested in the SWSI data for this year as
in
knowing that it will be published for many years to come. We're
actually
contemplating using the data in a water right condition to trigger a
change
in the minimum bypass flow requirement for a hydropower plant.

I'll be calculating the Aug 1 SWSIs when I get back to office later this week and next week. I can let you know when they are posted. Last months and historic info is on this web page:
<http://www.id.nrcs.usda.gov/snow/watersupply/swsi-main.html>

Shelly,

It is certainly our intent to provide SWSI data into the future. The form of the publication may change but the information will still be available.

I am forwarding this email to Ron Abramovich in Idaho who calculates the index and provides the index in the Idaho publications.

Jim

What is the easiest way to find Surface Water Supply Index information for Idaho? Do you intend to continue publishing SWSI data into the future?

Thank you.
