Subject: Water Permit 94-7434 and 94-7432 Ronald C. Long and Juliet E Long

Keith Franklin,

We agree that 0.12 cfs would suffice our need for irrigation water required for permit number 94-7434 and 94-7432.

Sincerely

Ronald C. Long
Juliet E. Long

Re: Application For Permit to Appropriate the Public Waters of the State of Idaho
94- 7434 and 94-7432

Dear. Mr. Long:

The Idaho Department of Water Resources (IDWR) is in the process of issuing a permit for the two above-mentioned applications. Before the permits can be finalized an issue with the irrigation component of the applications need to be addressed.

Upon final review of your applications IDWR discovered the amount of water requested for the irrigation diversion exceeds the amount normally allowed for the irrigation of 4 acres. Each application requests an amount equal to 0.14 cfs (63 gallons per minute) while the normal allowable is equivalent to 0.12 cfs (54 gallons per minute). If you desire the 0.14 cfs, please justify the need for that amount to the department or if you agree that the 0.12 cfs would suffice, please let me know in writing as soon as possible, so as not to further delay in the processing.

If you have any questions, don't hesitate to contact me at this office.

Thank you.

Sincerely,

Keith E. Franklin
Senior Water Resources Agent
