DEPARTMENT OF
WATER RESOURCES

Sir:

This letter is in response to the issuance of a water right license (License No. 31-7655) by your department to C. Michael Bennett (11/28/07). This notice of issuance of license was received in Sun City, AZ on Fri Dec 7, 2007. The delay in my receipt of your letter was a result of mail forwarded from my summer time residence and my winter address in AZ. A message was left on your voicemail on Dec 7, 2007.

The condition of the water right license — item 4 — needs to be reconsidered by your department. Item 4 does not permit irrigation of lawn, garden, or landscape as part of domestic use. My original intent as discussed with IDWR personnel and actual use was to use irrigation water for lawn, garden, & landscape.

Since the original filing I have used the spring water to irrigate yard, trees, and grass in a picnic area. This water was used through most of the irrigation season on an annual basis for the past 8-10 years.

On the date of the final inspection by the department two garden hoses were plainly visible. When adequate spring flow is available two sprinklers are used, at other times one. In the late summer when spring flow is low I collect water from the springs into a single pipeline. Flow in the tributary below the springs is intermittent. Most years no water reaches Miners Creek after June.

If you have questions please call 208-403-1597 or write 14801 N. Bolivar Dr, Sun City, AZ, 85351

Sincerely

C. Michael Barnett
