WATER RESOURCES

30 November, 2007

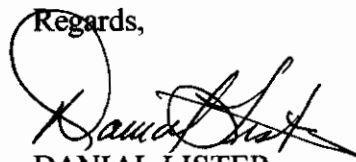

ATTN: Idaho Department of Water Resources, 322 E. Front Street, P. O. Box 83720, Boise, ID 83720-0098

SUBJECT: Request Extension for Water Transfer Right (#63-32060), Parcel-4, Salmon Ridge Subdivision, Nampa, Idaho

To Whom It May Concern:

1. Part of the conditions to completing the transfer was that a well must be installed prior to one year following the approval of the transfer. Due to unforeseen delays with Canyon County Planning and Zoning and subsequent agencies involved in approving the final plat as required by the Canyon County Development Services, the land parcels were not officially subdivided and recorded until October 2007. We (Salmon Ridge subdivision owners) must meet this requirement prior to digging a well to which the transfer will be applied; we were not able to drill individual wells in the designated time frame.
2. We are now into the winter months and I'm requesting that an extension be granted until December 2008 for the well provision. My intention is to drill a well in the spring or summer months of 2008.
3. POC is undersigned at 208-463-0509 or danlister@micron.com

Regards,

DANIAL LISTER
