Re: Falcon Building Project for Velma Morrison

Dear Terry:

I am responding to your December 12, 2007 letter and email in the above referenced matter. The applicant requested a change to extend the water bearing zone and drilling depths to 70 feet instead of limiting those to 40 feet. This affects water right, injection well and drilling permit approvals issued or pending with the Idaho Department of Water Resources (IDWR).

The information you provided is credible and reasonable. IDWR is revising all necessary approvals associated with this project as you requested on behalf of the applicant and the consultant of record, the Russell Corporation. Prior conversations with Marvin Meyer of the Russell Corporation confirmed that a request, most likely from your office, would be forthcoming in this matter.

It is reasonable for IDWR to complete the requested revision to 70 feet without additional procedural actions by the applicant. This should resolve the problem and allow all necessary approvals to be completed by IDWR.

Thank you for your help in clearing this up.

Sincerely,

Steve Lester
Water Rights Supervisor
