3. jroberts 11/12/2007 Legal Notice Remarks

Comment: Transfer seeks to take 3 existing wells and add them as points of diversion for two stockwater rights currently diverting a combined total of 0.35 cfs from groundwater for stockwater use and to change the place of use of both rights to show the location of the stock tanks. No new wells will be drilled. Location of the place of use is between 10.5 - 14 miles south of Malta on the east side of HWY 81.

Re: Evaluation of Sufficiency of Information Submitted

Re: Evaluation of Sufficiency of Information Submitted

This transfer seeks to tie together three existing stock water wells and show the place of use as where the troughs are/or will be located in the system. Two of the wells are associated with partial decrees. The well in Section 33 is associated with stock water right 43-10557 and this well is actually located on BLM ground. The decree listed it in the NWSW of Section 33 but according to survey information they submitted and verification from the applicant, it is located in the NWNESW of Section 33. They are working on getting a permit or agreement from the BLM. The well in Section 17 is associated with stock water right 43-4128. The well in Section 8 does not have a water right but will be connected with the other two wells and all three wells will be limited to the diversion rate of the two decreed rights. No new wells will be drilled. Approximate location of the place of use is between 10.5 and 14 miles south of Malta on the east side of HWY 81. (Except for the facts that the area is within the Raft River Critical Groundwater Management Area, and the well on BLM, advertising may not be necessary?) ***It was decided that since the wells may have a hydrologic impact on surrounding wells that advertising is needed.***

Authority to File:

IDWR Records show the water rights in the name of the applicant, Arimo Corporation. Warranty Deeds have also been provided to show ownership of the place of use. The Secretary of States page shows Arimo as a valid entity with Chris Robinson as the President. A lien holder letter has been provided by the lender showing approval of this transfer.

· Water Right Validity:

Partial decrees were issued for both rights on 7/24/1998.

· Injury to Other Water Rights:

The area is located within the Raft River Critical Groundwater Management Area, established in 1962, so measurement and/or reporting requirements should probably be instituted. At this time, however, there is no active water district.

· Enlargement of Use:

None anticipated, with proper measurement and/or reporting requirements when an active water district is formed.

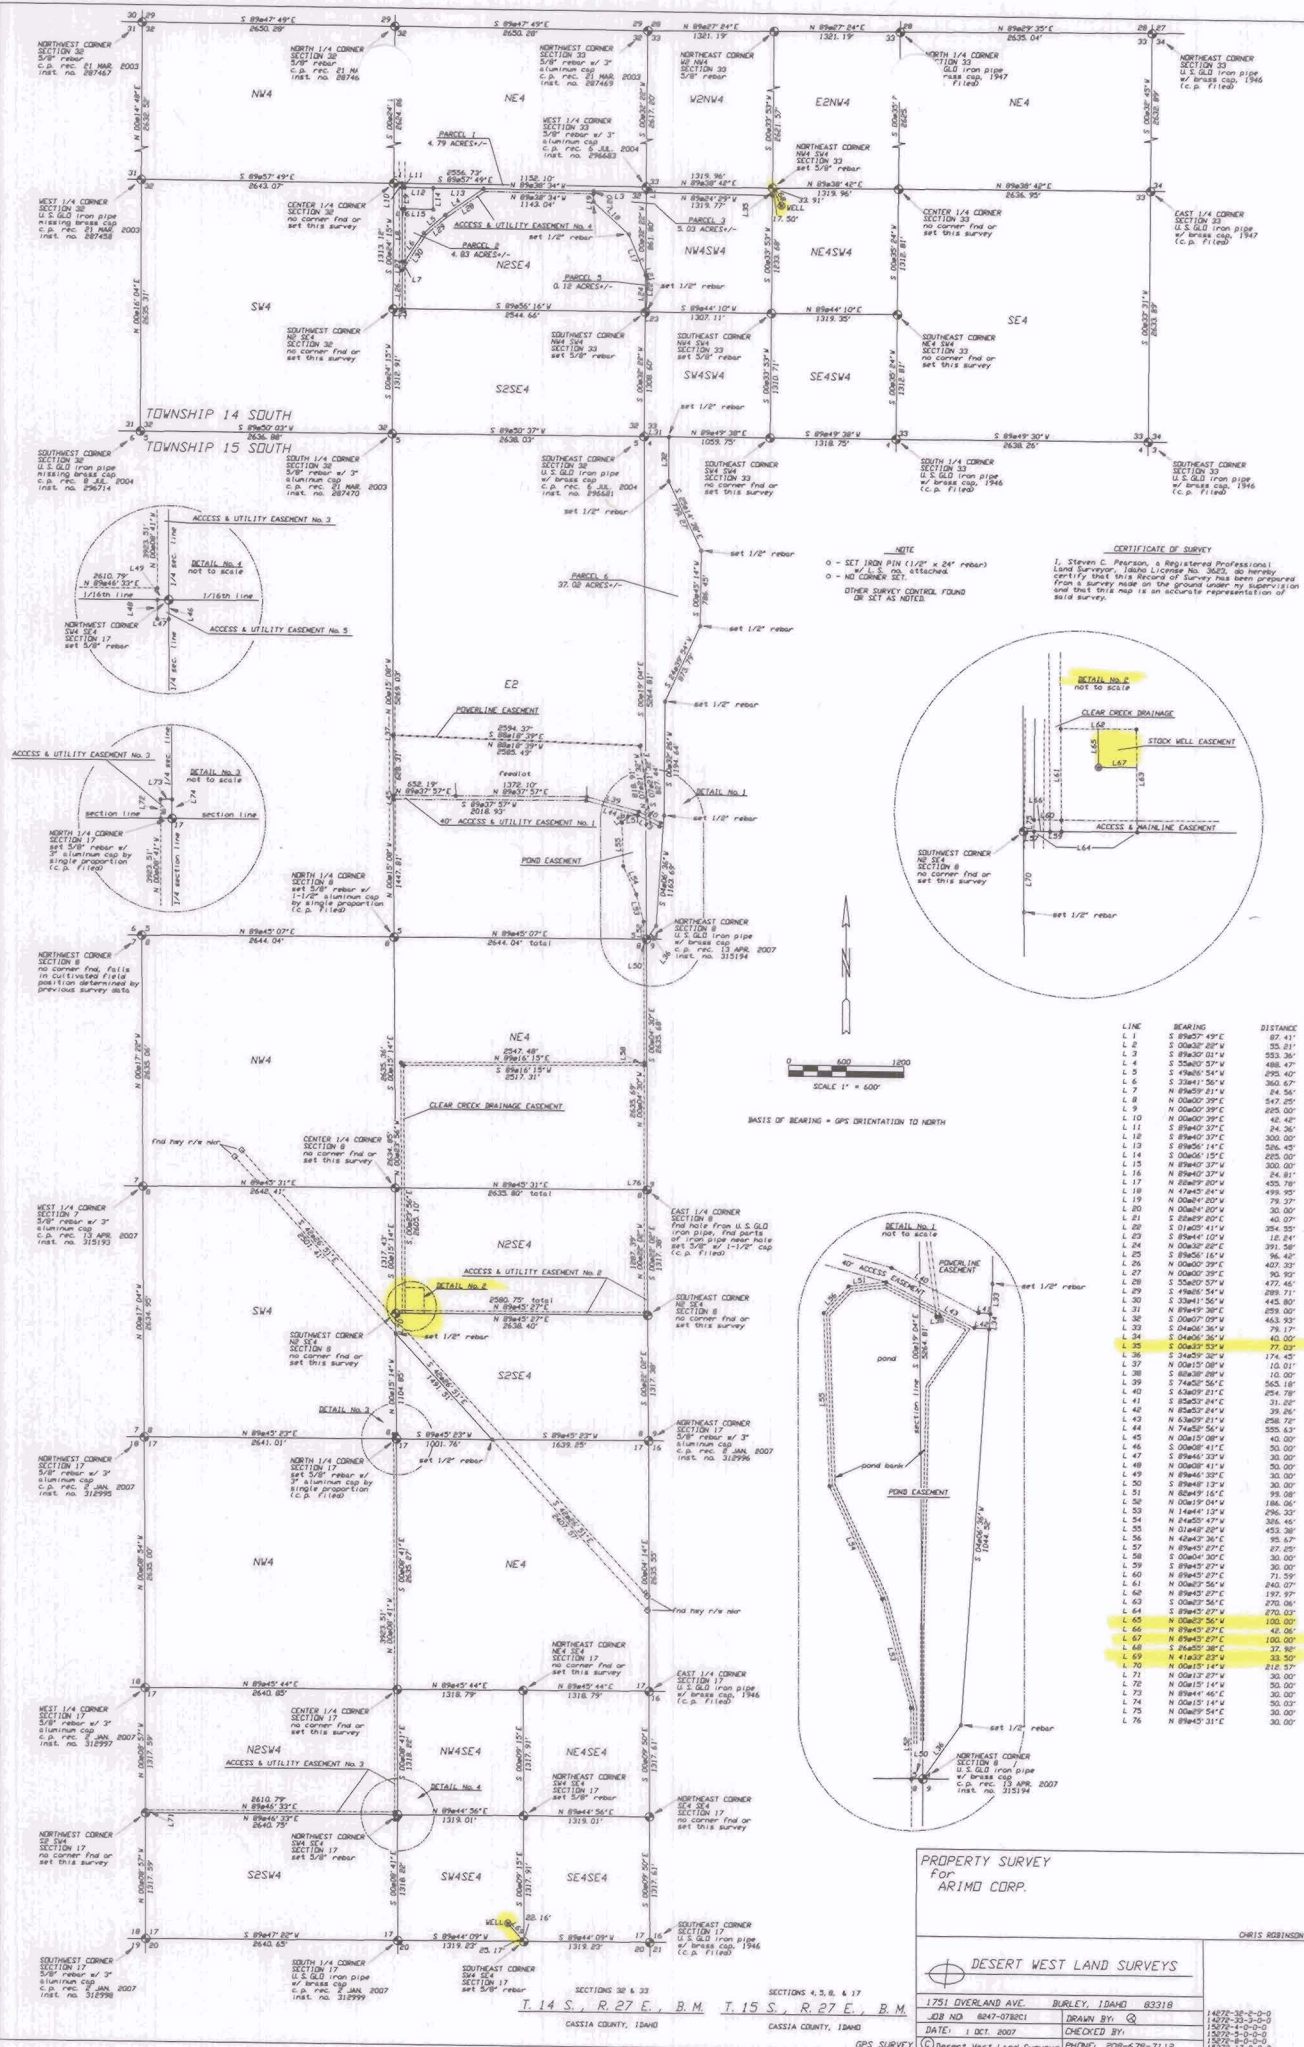

· Local Public Interest:

No negative impacts anticipated.

· Beneficial Use/Conservation of Water Resources:

Proposed use is recognized as a beneficial use of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

CERTIFICATE OF SURVEY
I, Steven C. Peterson, a Registered Professional Land Surveyor, Idaho License No. 1896, do hereby certify that this Record of Survey has been prepared from a survey made in the presence of my subordinates and that this map is an accurate representation of said survey.
