CSkinner did an extensive overlap analysis, see his 4/3/07 memo for details.

This application is proposing supplemental use to current Burnt Creek rights.

The applicant is adding additional home to property, so separate right needed for additional domestic use.

Standard W&S conditions apply.

I adjusted the usage under this permit from 0.12 cfs to 0.09 cfs since the applicant reduced irrigated acres from 2.2 to 1.1.

Recommend for approval.
