RE: Water Right #75-14004/Transfer #74198

Dear Water Right Holder,

In 2001 the Lemhi Soil Conservation District service assisted approximately 40 landowners in filing transfers with the Idaho Department of Water Resources in order to change the point of diversion for these water rights. The purpose of this change was to consolidates points of diversion and lessen the impact on wild salmon and steel head. The Lemhi Soil Conservation District paid the fee associated with these transfers at that time. These transfers were held back from processing due to the Snake River Basin Adjudication. The change in point of diversion has since occurred. The department has begun transfers, but as a result of this time difference some of the water rights are under new ownership. In the cases where this has occurred, due to administrative rules, this office is required to obtain a new copy of the transfer application signed and notarized by the current owner of the water rights. Transfer 74168 was originally signed by Dale Meddock, and was subsequently split into two separate water rights, yours and Stewart Carrington's. I have enclosed a copy of a transfer application, please review this document. If you understand the purpose of transfer and agree with this application please sign, notarize, and return this document to this office at your earliest convenience. I would also like to note that if a notary is needed, Bob Foster in our Salmon office can provide this service, his number is 208-756-6644.

If you have any questions, concerns, or reservations, please contact me at 208-525-7161.

Respectfully Submitted,

Joseph Larsen
Water Resource Agent
