

PreHearing Conference
September 18, 2007 @ 9:30 AM.
Bingham County Courthouse for
City of Blackfoot Transfers 72537
Protestant: Devon Woodland.

Mike
Virtue

Well proposed - wants no impact on Mr. Woodland.
Provide future growth and current. Marvin
talked about options. Maybe a monitoring
impact. Maybe Mr. Woodland would
consider to dig Mr. Woodland's well and
put in a new pump.

Woodland - Concern's if he can't supply water
to his well.

Fielding - Study - close well or 800ft away well ^{will be a} 1.7 feet
draw down on 1000 gallon. but well
will be designed 2000 gallon per minute.
2000 - calculation will 25ft on Mr. Woodland
or 21.3 feet.
lower Woodland's well to 30ft and replace
pump - is that palatable.

Mr. Woodland's well is 350' perforated from
60 to 140. The lowest level of pumping
is in the early spring. Rate of adhesion is
1300 gpm. - Draw down is 18.7 feet.

End of season is 15 feet.

It is common to fluctuate 20 feet during irrigation season.

City's proposal

- deepen well 30 feet
- replace pump & bowls - not motor.
- additional electrical cost - \$330⁰⁰ a year or \$670⁰⁰ if 2000 gpm - calculate the electrical cost over 10 yr. period until property changes hands.
- measurement - change if needed - 45 PSI =

Woodland - Would be more comfortable if well would be 1000 ft from his well.

Mayor - if impact the city would cut back -

300 ft for new well for City. - water measurement on City well.

Oct 18th - will hear from Ron from City on Blackfoot - if going to resolve - other than that we will schedule hearing in 30 more days.

send ~~the~~ exhibited form to Ron Harwell.

- Transfer Application 72537.

- City of Blackfoot -

- Mike Virtue - Mayor

- Well design - 2000 gpm.

Woodland well.

- 350'

60' } Perforated
140' }

- spring, 60'. 18' draw down.

July - 36'. 15' draw down

- 1300 ft. -

- Well will be drilled by Cushman -

- 1000 gpm. -
- prior to next irrigation season -

- City will lower pump 30' - new -

- pay. n % of power bill. with escalation clause -

- provide data to Woodland -
