REQUEST FOR EXTENSION OF TIME

TO PROVIDE ADDITIONAL TIME IN WHICH TO SUBMIT PROOF OF
BENEFICIAL USE FOR A WATER RIGHT PERMIT

MAR 11 2005

DEPARTMENT OF
WATER RESOURCES

The Idaho Department of Water Resources will consider this form as a request that the permit holder(s) be granted an additional period of time under the provisions of Section 42-204, Idaho Code in which to complete development of a water right.

Permit No. 63-12461 and 63-12470

Name(s) of Permit Holder: City of Boise Public Works Department

Mailing Address: P.O. Box 500, Boise, ID 83701-0500

Date Proof is Due: 5/1/2005 Telephone No. 208-384-3901

Describe what work has been completed toward the development of this water right:
(This must be filled out! If no work has been completed, show "none".)

See attached remarks

Costing \$ 600,000+

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

See attached remarks

Permit holder(s) request an extension to May 1, 2010, XX

FEE: \$50.00

Ron Redmond, Assistant City Engineer
(Signature)*

*If other than permit holder, Power of Attorney must be supplied.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

IT IS HEREBY ORDERED that the above request for extension of time be

APPROVED and the time within which to submit proof of beneficial use is extended
to May 1, 2010.

Signed this 2nd day of June, 2005

Gary Speckman

Remarks for Request for Extension of time for Permits 63-12461 and 63-12470
City of Boise Public Works Department

Permits 63-12461 and 63-12470 are authorized for development of 595 acres within a 760-acre place of use and a maximum diversion rate of 9.80 cfs. The City has spent more than \$600,000 on development of these permits, with additional expenditures authorized for 2005. Development of these permits is detailed below.

Permit 63-12461. The City of Boise has drilled and equipped one well authorized under permit 63-12461. The well is 20-inches in diameter with a total completed depth of 560 feet. The well has been equipped with a 500-hp variable-speed turbine pump rated to produce 3,000 gpm (6.68 cfs) at 60 psi discharge pressure. A buried mainline and distribution piping from the well has been installed to serve lands under the permit and to interconnect the new well with other wells operated by the City of Boise at the Twenty Mile South Farm. The cost for well drilling (\$144,000), pump installation (\$183,000), and mainline installation (\$116,000) total \$443,000. The City has authorized installation of one full-size pivot sprinkler and one mini pivot sprinkler in 2005 that will irrigate 150 acres within the permit 63-12461 place of use.

Permit 63-12470. In 2004, approximately 86 acres were irrigated under permit 63-12470. Irrigation of the 86 acres under 63-12470 has occurred using water from existing Twenty-Mile South Farm wells. The City has installed one full-size pivot sprinkler and one mini pivot sprinkler that will be operational in April 2005 for irrigation of an additional 143 acres of irrigation within the permit 63-12470 place of use. Costs for these pivots are approximately \$175,000. Not included in these costs are wheel lines used for irrigation of 80 acres and field development (rock removal) costs.

Proposed Irrigation Development Following the 2005 Irrigation Season. By the end of the 2005 irrigation season, the City of Boise will have developed 379 acres of irrigation under permits 63-12461 and 63-12470, and a diversion capacity of 6.68 cfs. The City plans to install one additional well and provide irrigation to an additional 216 acres of irrigation to complete the development authorized by these permits. The City anticipates submitting applications to amend the permits to (1) add existing City wells as authorized diversion points and (2) add one new well site as a new diversion point.
