**Re:** Review

---

Review finds no reason why permit cannot be issued; application was not protested and does not appear to cause any injury to other rights. No special administration areas were found although there is an overlapping statutory claim (# 15-4163) for the same POU, permit was conditioned accordingly. The applicant does intend to pursue the claim. There was a discrepancy found on the application regarding the total number of acres to be irrigated. The applicant was called and it was found that the intention was to have the full 39.9 acres irrigated instead of the 38.6 acres originally listed. Will not be re-advertised as the amount being changed is basically negate.
