Re: license review

While reviewing this file for licensing, I found the following worth noting:

Neither the POD nor the POU shapes had been created prior to my review. I created them based on the field exam notes and map.

Greg Taylor from IDWR northern region, had reviewed the field exam. I used his place of use acreage correction and I drafted an amendment to the license to correct for the change in POU. A phone call from the permit holder prompted a review of the calculations, a correction to the annual volume and a second draft of the amendment to the license.

I found that there had been a previous domestic well on this property (Tag number:DD 22264, Permit ID: 776638). It was approved for abandonment by IDWR in April 2002.

The permit condition which addressed the Rathdrum Prairie Ground Water Management Plan was deactivated after the permit for this water right was issued. For the license, I deleted that condition and replaced it with the most recently approved version, which refers instead to the Rathdrum Prairie Ground Water Management Area.
