Shelley,

I understand and thank you.

Unless I am mistaken, the permit holder has no remaining actions left to complete the licensing of 37-7638.

Based on the information provided to IDWR last March (the Bill and Bonnie Sweet affidavits and map) and because of the difference in acreage between the claim and the prelim recommendation, I thought perhaps the prelim was an indication of IDWR's response to the March information, and that coincident with the prelim recommendation, a draft licensing amendment was being prepared.

If I'm on the wrong track, can someone advise me of the status of permit 37-7638?

Thanks.

Jo

Jo,

On the preliminary recommendation for 37-7638 there is a remark that says:

This right is conditioned upon completion of the appropriation in accordance with the statutory procedure for appropriation of water rights. This right remains subject to all conditions set forth in the permit upon which this right is based, and will be subject to all conditions set forth in the license issued by IDWR upon completion of the statutory appropriation process.

The remark is used on claims based on permits. It is intended to mean that the water user must complete the licensing process in order to complete the appropriation process. Normally the other elements of the recommendation match those of the permit. In this case, the recommendation looks a little different from the permit. The bottom line, however, is that the license, when one is issued, will define the water right.

Shelley,

I just reviewed and attach the SRBA preliminary recommendation for 37-7638. SRBA claim 37-7638 is also attached.

Should the prelim be considered a draft for the license?

Thanks.

Jo

Erin,

Hope you had a good experience in the field. When you have a moment on Friday, please update Jo Beeman and me regarding File 37-7638.

Thanks.

Shelley
