

MEMORANDUM

Date: November 13, 2007
To: Water Right File 75-14417
From: nvandyke
Re: permit review

Application is for 0.24 cfs total diversion from spring tributary to sinks tributary to Salmon River. Water use is 11 acres irrigation and stockwater. Permit appears to fall within all requirements of IDWR water appropriation rules 40.05. F & G as well as DEQ commented on application with no objections. Map submitted with application showing the pou was drawn incorrectly. Spoke with applicant on 11/8/07, necessary changes to shape in ArcView made, permit holder aware shape shown is different than what was drawn on application.
