RE: Transfer 74183

Shirley Ann Parmenter and/or
Jack Parmenter
139 Cemetery Ln
Salmon, Id 83467-5058

Dear Mr. and Mrs. Johnson,

In 2001 the Lemhi Soil Conservation District service assisted approximately 40 land owners in filing transfers with the Idaho Department of Water Resources in order to change the point of diversion for these water rights. The purpose of this change was to consolidate points of diversion and lessen the impact on wild salmon and steel head. The Lemhi Soil Conservation District paid the fee associated with these transfers at that time. These transfers were held back from processing due to the Snake River Basin Adjudication. The change in point of diversion has since occurred. The department has begun processing these transfers, but as a result of this time difference some of the water rights are under new ownership. In the cases where this has occurred, due to administrative rules, this office is required to obtain a new copy of the transfer application signed and notarized by the current owner of the water rights. Transfer 74183 was originally to transfer water right 75-10926A, this water right has since been split into water rights 75-14227, and 75-14228. Transfer 74183 is now to change the point of diversion on water right 75-14227. I have enclosed a copy of a transfer application, please review this document. If you understand the purpose of transfer, and agree with this application please sign, notarize, and return this document to the address listed below at your earliest convenience. I would also like to note that if a notary is needed, Bob Foster in our Salmon office can provide this service his number is 756-6644.

If you have any questions, concerns, or reservations, please contact me at the number listed below.

Respectfully Submitted,

Nate Arave

Water Resource Agent
