Mr. Keith Franklin
Idaho Department of Water Resources
Northern Region
7600 Mineral Drive, Ste 100
Coeur d'Alene, ID 83815

Dear Keith:

REFERENCE: DOUGALL: 94-7423

We have reviewed the above-named application by Connie Dougall to divert 0.06 cfs from the North Fork Coeur d'Alene River for irrigation.

The North Fork Coeur d'Alene River is managed by IDFG as a quality westslope cutthroat trout fishery and it is very popular with sport fishing anglers. This system is an important component of westslope cutthroat trout habitat range-wide. Several research and restoration projects have been and are currently being conducted on the North Fork and the Little North Fork Coeur d'Alene Rivers. Idaho and neighboring states (MT/WA/OR) have recently fended off a listing of westslope cutthroat under the Endangered Species Act by demonstrating that healthy populations and habitat exist in places like the North Fork Coeur d'Alene River, and that the appropriate state regulatory mechanisms are in place to protect them.

The recent proliferation of recreational lots along the Coeur d'Alene and North Fork Coeur d'Alene Rivers has severely degraded the riparian habitat along the stream course. Riparian vegetation has complex root systems that slow stream bank erosion during high flows with well-rooted, woody vegetation that can withstand increased flows more effectively than stream banks that are sparsely vegetated or grass covered. Trees and shrubs provide shade, which is critically important for maintaining the cooler water temperatures necessary for our native trout. Additionally, trees contribute valuable large woody debris in the stream that provides cover for fish and other aquatic species.

Although the amount requested in this particular application is small (0.06 cfs), we are concerned that the cumulative effects of recreational lot owners applying for diversions to water landscaping will decrease stream flows, particularly during the low flow summer months, which can be harmful to this popular fishery.

The Department believes that this request is in conflict with the local public interest and protests issuing this permit.

Keeping Idaho's Wildlife Heritage
