**Re: Expedited Water Rights Application for
815 E. Park Boulevard
Boise, Idaho 83712**

John Westra, Manager:

We are remodeling an existing building at 815 E. Park Blvd. and as part of the remodel we are installing a hydronic heating system which includes, a supply well to be located at the Southwest corner of the property, and an injection well to be located at the Northeast corner of the property. In March of 2007, we submitted an application for water rights so that we could proceed with construction of the supply well and injection well.

Due to the fact that hydronic heating system does not consume any water, but cycles the water from the supply well, through the building, and back into the water source, we are requesting that the water rights application be expedited. Also, this project is currently under construction and is scheduled to be complete at the end of May. If the water rights were held up, this could delay completion of the project and cause a financial hardship for the owner. Any assistance on the review end to expedite the process is much appreciated.

If you have any questions or would like to discuss this matter further, please contact me at 331-3200 ext. 209 or at cnelson@gomodus.com. Thank-you for your consideration in this matter.

Respectfully Submitted,

Cory Nelson, Project Manager
