They called in yesterday saying that they were coming in to visit with me yesterday but they didn't show.

Kelly,

I think it's important to get this one resolved as soon as possible. Please keep me apprised of any progress. If the amendment has not been submitted in a couple of weeks, IDWR will issue the licenses for less than they could have had.

I called Karen Anderson 9-25, 2007 and visited about the paperwork concerning the potential licensing amendment for 47-8268B. She could recall the discussion and she recalled that I had sent her an e-mail regarding the amendment but that she had not had time to read it. We briefly discussed the necessity of the amendment and she said that she needed to check on the paperwork and get that she would get back to me.

I called again today 9-27-2007 and talked to a secretary. The secretary took my name and business information and talked to Karen. She said that Karen was with a customer right now but would get back to me as soon as she could. I have yet to hear from her.

Regarding the potential transfer to resolve the illegal diversion she said that they had talked to Brockway Engineering but that they had not responded to the inquiry so nothing has been done.
