RE: Water Right Permit No. 47-08268B

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the place of use was developed differently than described on your permit. Essentially, only 34 of the 37 acres authorized under Permit 47-8268A were developed, which allows for 3 acres to be added to Permit 47-8268B. This shift of acres from one permit to the other is possible because they have the same origin, same priority date, same ownership, and same development period.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$50.00 filing fee within 14 days.

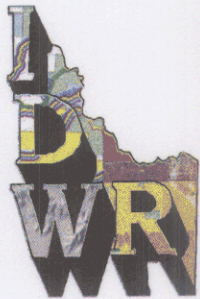

I have also enclosed maps of the places of use proposed for the licenses to be issued in connection with Permits 47-8268A and 47-8268B.

If you have any questions, please call me at 208-287-4947.

Sincerely,

Shelley W. Keen
Water Rights Supervisor
