Re: license review

While reviewing this file for licensing, I found the following worth noting:

Neither the POD nor the POU shapes had been created prior to my review. I created them based on the field exam notes, one of the maps submitted with the permit, and Bonner county taxlot information. Both the permit application and the beneficial use field exam had the POD and POU for this license located in Twp56N, Rge3W, sec30, SESE. I found the Diehl property, the POD and the POU located in Twp56N, Rge3W, sec30, SWSE.

The Diehls also have a domestic well (Well ID 335042) located within this property at Twp56N, Rge3W, sec30, SWSE. The well location was established by GPS coordinates, and in turn, helped to confirm the correct property location for this license. I drafted a license amendment to correct the POU and POD locations.

I added a minimum streamflow condition.
