Re: Transfer Evaluation

This transfer proposes to change the place of use of this water right, and to add a point of diversion. The change in place of use is a result of changing from hand lines to pivots. The addition of the place of use is for the purpose of increasing total head within the system allowing a switch from diesel pumps to a gravity fed system.

This application for transfer has been amended to reflect changes in the recommendation of this water right. This transfer was also amended to reflect a change in place of use that is going to be a result of new pivot installation.
