

MEMORANDUM

Date: October 23, 2007
To: Water Right File 15-7284
From: cpadilla
Re: Permit Review

After sending request to applicant for the 40.05 information, he indicated 198 acres is all he intends to irrigate, not the 232. He amended his application to reflect this change and noted he does not plan on using end guns. I made the adjustments to the POU based on this information. The actual POU may be different and will need to be verified upon licensing since the applicant didn't specify exactly where to deduct the acres from on his amended application.

10/23/07-I had a conversation with the applicant and let him know that I adjusted the acreage based on imagery of his POU and the fact he won't be using end guns. Also mentioned that there will be a condition on the permit instructing him to use his surface water rights first. He was okay with both these issues.
