To: Transfer 73386 File
From: Douglas Jones
Re: Evaluation of Sufficiency of Information Submitted

NOTE: This transfer is proposed to be processed without advertising due to the clerical error nature of the correction.

Transfer seeks to correct the irrigation acre distribution between QQ tracts to reflect the as-built system that was approved under transfer #70405 (11/2003). T#70405 inadvertently transposed acreage between the two approved QQs, and the as-built pivot system was not centered on the 16th corner as proposed. This results in 1 acre being irrigated in the NWNE of the section. No other changes are proposed.

- **Authority to File:**
IDWR Records show the water right in the name of the applicant and is the same as the recently updated County tax lot data. The application states that there is no lien holder on the property.
- **Water Right Validity:**
The right was recently recommended in the B47 Director's Report for Irrigation & Other Uses and is pending Partial Decree following an objection period ending 9/19/2007. The right was recommended consistent with approved transfer #70405. Following approval of this transfer the SRBA Court will be provided Notice of the administrative change and docketed accordingly.
- **Injury to Other Water Rights:**
No impact provided the conditions from previous transfer are carried forward. Some of these conditions affect the relative priority dates relating to Salmon Falls Creek, Snake River water rights and the Swan Falls Agreement.
- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No negative impacts anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
