

Idaho Dept of Water Resources
Conversation memo

Date: 9-20-2007

File: Phone conv with Steve Davis 45-7342

Prepared by Kelly K Christensen

I called Steve Davis of the Burley BLM office to visit about the spring development relating to this permit. He checked with the range tech and he was surprised that the system was not working. He stated that they still wish to pursue the permit.

Steve pulled their file for this use but the file had virtually no information concerning the system development or construction materials. There were no recorded measurement data in the file.
