

MEMORANDUM

Date: September 17, 2007
To: Transfer 73991
From: mholliday
Re: transfer evaluation

This transfer proposes to rearrange 32 acres of the place of use to reflect a system change from handlines to pivots. The place of use is irrigated by one water right and the source is ground water.

Authority to File:

Applicant is the owner of record on the SRBA directors report. Ownership of the irrigated land in section 16 is confirmed by warranty deed. The corporation is registered with the state and is in good standing.

Water Right Validity:

Directors Report has been filed and no objections have been filed. Land still being irrigated according to aerial photos. Forfeiture not an issue.

Injury to Other Water Rights:

Injury not apparent. The well is not in a water district nor is it located in the ESPA. The transfer does not involve a change in point of diversion. Only a small change in place of use with no hydrologic impact. Transfer will be advertised to determine any protests.

Enlargement of Use:

There is no evidence of enlargement of use. No change in the number of acres irrigated.

Local Public Interest:

No issues identified.

Beneficial Use / Conservation of Water Resources:

No issues identified.

Review of the application reveals no clear inconsistency with the criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
