Kent Foster - experts have been hired to show
injury and to answer questions.

How the City approach analysis - and impact

But there should be no injury based on
qualified people. The City is prepared to
do mitigate those injury if necessary.

Such as deepening wells or connecting
homes to city lines. and make insurance

to that effect. Proceed of explanation of analysis.

Tom Wood - Clearwater Geosciences
Conservative draw downs. Tom believes
~~that~~ the draw downs will be less.

Ammon well #10

2500 gpm peak pumping
Transmissivity 30,000 ft²/da

Ammon well #11

2,000 gpm peak pumping
Transmissivity 25,000 ft²/day

Storativity for both wells - 0.05 (typical)

Average Pumping Rate on City Wells
Steady pumping is 36%

Well #11 / Steady pumping for 3 yrs @ 720 gpm.
Superior / Steady pumping for 120 days at 2000 gpm.

- farther people are away the less impact.
- No credit for Recharge.
- Transmissivity used is more than 20 times lower than IDWR model.
- No credit taken for natural layering isolating protestants wells

Table of Protestants Wells

Penetration depth is amount of standing water in the well.

Only one protestant's well taps a portion of this lower zone

Mike Rohe - Clearwater GeoScience.

Well that 3.33 miles from #11 - It has gone down 4 ft in 37 yrs. ^{a year}
20 foot water variation on a (20 yr avg.)
lowest time is March.

Mayor. Retain the water rights - Keep water with the land - The City takes ownership of water in irrigation district.

Is there a plan for recharge - Yes they have a plan and its on paper - but not for public view yet.

→ Jerry Rigby - deepening, hooking on to the city - in writing and bound. This protestant would be pretty satisfied.

→ Kent - Advantage of all parties - Compose on selected well. The city would be willing to put in a monitor, electronically \$500 to \$600 a well.

Without cost. to protestant. After
so many years the protestant would
maybe would like to take it on.

- Jerry - Documentation provided.
- Kent - Stipulated agreement.
- Mayor - Maybe 5 ~~are~~ on 5 wells.
- Jerry - Longevity is what's the concerns.
- City - If they are causing the effect. They
are willing to fix it.
- Who wants a monitor? see front page *
- Kent - City proposing - get general language.
- Old wells have an old water rights too!
4 wells are so old because they would
have drill them new wells.
- Injury to Water ~~rights~~ Rights.
- November 6th 9:00 A.M. - ~~10~~
