Re: license review

While reviewing this file for licensing, I found the following worth noting:

Neither the POD nor the POU shapes had been created prior to my review. I created them based on the field exam notes and map and the Bonner County taxlot boundaries.

There are two POD locations listed on the beneficial use exam. The boat dock, that shields the pump, is in section 22. So I deleted the POD that is in section 27 and removed the condition that confines the diversion to a single point.

The Pend Oreille River has an established minimum flow requirement so I added a condition to license which addresses that requirement.
