

MEMORANDUM

To: Water Right File No. 57-11610
From: Aaron Marshall
Date: September 18, 2007
Re: Water Right No. 57-11610, License Processing

Chronology of Water Right No. 57-11610:

Water right permit no. 7597 was split on March 13, 2002, into water right permit nos. 57-11610, 57-11611, and 57-11612.

Application for Amendment of Permit was received on May 29, 2002.

The field examination was conducted by Lori Graves on August 16, 2005.

Proof of Beneficial Use was received on September 8, 2005 with proper payment.

Beneficial Use Field Report completed on March 5, 2007.

A Preliminary Order voiding the Application for Amendment of Permit was issued on April 19, 2007.

Upon evaluation of water right permit no. 57-11610 for license issuance, I made the following observations:

The point of diversion overlaps with water right permit no. 57-11612.

The field examiner recommended; domestic use (in-house and ½-acre irrigation) for four homes, a flow rate of 0.09 cfs, and an annual volume limit of 4.8 AFA based on 0.6 AFA for in-house use and 0.6 AFA for ½-acre irrigation per home.

I concur with the field examiner's indication that the conditions of permit approval have been met.

The field examiner made a theoretical flow computation assuming 70% pump efficiency. Flow and volume calculations have been checked and are correct.

The license for 57-11610 was issued based on the field examiner's recommendation.

Shape files and draft license were created by Lori Graves prior to my evaluation. Shape files accurately depict her findings as the field examiner.
