

WR 67-14321

9/23/05-

Reference to letter to Claimant on
July 14, 2005, he has installed
lockable devices on line from Salt Creek.
As for having measuring devices, I
can't see that this is necessary as
line left wide open would be hard
pressed to receive .10 cfs = 5" = 45 gpm.
This system as it is now is okay
with me.
